notice of the annual general meeting

Notice is hereby given that pursuant to the Companies Act 2015, as amended recently, the Forty-Second Annual General Meeting of the Company will be held in a hybrid format via electronic communication (**ZOOM**) on Thursday 23rd June 2022 at the Registered Office of the Company, Kenindia House, 12th Floor, Loita Street, Nairobi at 12 noon to transact the business detailed below.

Audited financial statements for the year ended 31st December 2021 have been e-mailed to shareholders. Shareholders will be able to follow the meeting and vote electronically in the manner detailed in the notes below. Shareholders are requested to send their questions in respect of the items in the agenda at least 48 hours before the meeting to Ms Phoebe Macharia of Adili Corporate Services Kenya, Company Secretaries. e-mail: Phoebe.Macharia@adili.co.ke* with the subject *"Kenindia Assurance Company Limited – 2022 Annual General Meeting."

ORDINARY BUSINESS

1 To read the notice convening the meeting.
2 To receive the proxy forms and confirm the presence of a quorum.
3 To receive the report of the auditors on the financial statements for the year ended 31st December 2021.
4 To receive the Directors' report and audited financial statements for the year ended 31st December 2021.
5 To declare a dividend.
6 To approve Directors' fees.
7 To re-elect the Directors of the Company:
   (a) Dr Patricia Kingori retires by rotation in accordance with Article 93 of the Company's Articles of Association and, being eligible, offers herself for re-election;
   (b) Mr Mangalam Ramasubramanian Kumar retires by rotation in accordance with Article 93 of the Company's Articles of Association and, being eligible, offers himself for re-election; and
   (c) Mr Satyajit Tripathy, who was appointed as a Director during the year, retires in accordance with Article 97 of the Company's Articles of Association and, being eligible, offers himself for re-election.
8 To appoint an Auditor
   Messrs. Grant Thornton have expressed their willingness to continue as auditors of the Company. The Directors recommend that they be re-appointed as the auditors in terms of the Insurance Act (Cap 487) and in accordance with the Companies Act 2015 and that the Directors be authorized to fix their remuneration.

By Order of the Board

Partner
20th May 2022

NOTES FOR ZOOM MEETING:

1. The **Zoom** meeting invite will be sent to all shareholders via email. If the invite is not received within 24 hours to the meeting kindly reach out to us via e-mail Phoebe.Macharia@adili.co.ke.
2. Financial Statements for the year ended 31st December 2021, Notice for the Annual General Meeting and proxy form are also available on the Company's Website.
3. Shareholders are requested to submit their questions with respect to items on the agenda 48 hours to the meeting by e-mail to Ms Phoebe Macharia of Adili Corporate Services Kenya, Company Secretaries, at least 48 hours before the meeting e-mail: Phoebe.Macharia@adili.co.ke with the subject "Kenindia Assurance Company Limited – 2022 Annual General Meeting."
4. A Member entitled to attend and vote at this meeting is entitled to appoint a proxy to attend and vote instead of him. A proxy need not be a member of the Company. A proxy form, which can be printed and e-mailed to Ms Phoebe Macharia of Adili Corporate Services Kenya or deposited at the Registered Office at least 24 hours before the time appointed for the meeting to be valid, is attached separately.
5. Corporate Members are requested to appoint representatives by completing and signing the letter of representation to reach the Registered Office not less than 24 hours before the time appointed for holding the meeting or adjourned meeting. Letters of Representation are being sent separately to corporate members.

On behalf of the Board of Directors of Kenindia Assurance Company Limited I am pleased to present to you the Annual Report and Audited Financial Statements of the Company for the year ended 31st December 2021.

Overview Of The Economy

Kenya's economy grew by 7.5 % in 2021 compared to a contraction of 0.3 % in 2020; the growth was boosted by recovery from the effects of the COVID-19 pandemic.
All economic activities registered positive growths except agriculture which shrunk by 0.3 % and was mainly caused by unfavorable weather conditions in various parts of the country, which resulted in reduced crop and livestock production.
The country's macroeconomic environment is expected to remain stable despite the likelihood of a rise in inflation, weakening of the Kenya shilling against major trading currencies and significant rise in energy prices.
Going into 2022, the economy is expected to continue its recovery trajectory due to continued recovery of businesses from the adverse effects of the pandemic and completion of key infrastructure projects as the government fast tracks the completion of major projects before the August 2022 elections after which, the next regime takes over leadership.

Financial Markets

The Central Bank Rate was maintained at 7.0% during the year 2021to support economic growth.
In 2021 the rate on the 91-day Treasury bill closed at 7.0 % compared to 6.9% at the end of year 2020. The Central Bank's efforts to keep rates low are at risk with interest on government securities expected to increase mainly driven by increased borrowing appetite by the government coupled with investors' pursuit for higher returns.
The Kenya Shilling depreciated against the US Dollar to close at Kshs 113.14 in 2021, compared to Kshs 109.17at the end of 2020.
The current pressure on the shilling is caused by increasing dollar demand from energy and commodity importers as global fuel prices and costs of imports continue to outweigh the dollar inflows as some of the sectors like tourism are yet to fully recover.

Nse Share Index

The NSE 20 share index closed the year at 1,902.57 points. This is 1.61% higher than 1,872.42 points at the beginning of the year.

Inflation

The annual average inflation increased from 5.60% in 2020 to 5.73 % in December 2021. This was mainly attributed to rise in fuel prices and a sharp rise in prices of staple foods, given the drought conditions. Inflationary pressures were experienced globally partly because of the rising global oil prices, and this is expected to continue in the first quarter of 2022.

Compny Performance

(I) **General Insurance Business**

The General Insurance business registered a gross premium of Kshs 2.58 billion as compared to Kshs 2.47 billion in 2020 registering a growth of 4.45%. The Company reported a net profit after tax of Kshs 573.94 million (2020 - Kshs 221.63 million) under non life segment.

(II) **Life Assurance Business**

The long term business recorded gross premium income, including pension funds deposits of Kshs 11.12 billion against Kshs 7.37 billion in 2020 registering a growth of 51.59 %.

Premium income for Ordinary Life was Kshs 3.24 billion against Kshs 2.67 billion for the year 2020 registering a growth of 21.32%.

The Group Life Business registered a 14.33% decline having premium of Kshs 48.06 million in 2021 compared to Kshs 56.10 million in 2020.

Annuity contributions recorded a 16.82% decrease to Kshs 656.33 million in 2021 down from Kshs 789.08 million in 2020.

Contributions under Deposit Administration and Retirement Fund increased to Kshs 7.17 billion in 2021 from Kshs 3.85 billion in 2020 billion registering a growth of 86.11%.

The funds in the Long term business (Life Fund) and Deposit Administration stood at Kshs 55.16 billion as at 31st December 2021 compared to Kshs 43.96 billion in the previous year representing a growth of 25.47%

Actuarial Valuation

The Company's Actuarial Valuation for Life Business was carried out at the end of the year. The actuarial surplus inclusive of Annuities, Deposit Administration and Retirement Fund (net of actuarial reserves set aside brought forward) before any allocation for the year 2021 was Kshs 7.38 billion. The Company declared an interest rate of 10.75 % (2020-10.75%) on Retirement Benefit funds, a simple Reversionary Bonus of 6.00% (2020 - 6.00%) on with-profit Ordinary Life Policies, 4.00% (2020 :4.00%) final additional terminal bonus for ordinary Life Policies matured, bonus of 11.00 % (2020-11.00%) on Capital advantage policies and 11.00% (2020: 11.00 %) interest on Bima Account plan.

The company did not declare one-off special bonus for year 2021, (2020:2.00%) on with-profit Ordinary Life Policies and terminal bonus (2020: 2%) on ordinary Life policies matured.

The Actuary recommended a transfer of Kshs 375.00 million (2020:357.14) out of the actuarial surplus, for the benefit of shareholders.

Investment Income

The net investment income of the company increased by 25.66%, to Kshs 6.64 billion in 2021 from Kshs 5.29 billion in 2020. The net investment income of Life business was Kshs 6.11 billion in 2021 compared to Kshs 4.86 billion in 2020, an increase of 25.73%. The net investment income of Non Life business was Kshs. 530.31 million in 2021 compared to Kshs 424.80 million in 2020, registering an increase of 24.84%.

Group Performance

The total gross premium accounted by Tanzindia Assurance Company Limited, a subsidiary of the Company was Kshs. 666.96 million in the year 2021 as compared to Kshs 587.53 million for the year 2020, being an increase of 13.52% and its net profit after tax was Kshs. 33.83 million in 2021, with a Kshs. 84.67 million net profit recorded in the year 2020.

The total assets for the Group stood at Kshs 69.83 billion in 2021 as compared to Kshs 57.68 billion in 2020. The shareholders funds increased from Kshs 4.40 billion in December 2020 to Kshs. 5.13 billion at the end of 2020.

Dividends

The Board has recommended a dividend of Kshs 7.50 per share for the year ended 31st December 2021 subject to the members' approval at the Annual General meeting.

Board

The directors who held office in 2021 are listed on page 1 of these financial statements.

Future Outlook

Kenya's economy is projected to grow by 4.9% in 2022. The rebound is attributed to easing of COVID-19 restrictions, which has seen recovery in various sectors of the economy such as manufacturing, construction, transport, education, information and communication and trade. However, the drought conditions continue to slow the agricultural sector.

The Company remains on course implementing its 2021 – 2025 strategic plan focusing on customer service through innovative use of resources to maximize stakeholders' value.

The insurance industry is preparing for the implementation of the new IFRS17, Insurance Contracts, financial reporting standard which comes into effect in January 2023. Its dynamics will not only have implications on the financial disclosures of the company, it will also have profound operational impacts on all aspects of the organization.

The company shall continue to be responsive to the new changes, embracing innovation and continuous improvement in all facets of the business to adapt to the ever-evolving business environment.

Appreciation

On behalf of the Board, I would like to congratulate and thank the Company's management and staff for their sincere efforts in implementing the strategic plan during the year and taking the Company to a progressive direction in these challenging times.

My deep appreciation is also extended to my fellow Board members for the invaluable guidance they have extended to the company's leadership. I also extend my sincere appreciation to you, our Shareholders and members for continuous support provided to the company. I also sincerely thank all our brokers, agents and associates for their committed support.

M N MEHTA

CHAIRMAN

Corporate governance is the set of processes and organizational structures through which the Board and senior executives manage the Company at the highest standards.

The Company is committed to uphold the best practices of corporate governance. The role of the Board is to determine the Company's policies and strategies, to monitor the attainment of business objectives and to ensure that the Company meets its obligations to the shareholders and all the stakeholders. The Board is responsible to shareholders for promoting the long term success of the Company, and in particular, for setting the Company's strategy, monitoring management's performance against the strategy, setting the Company's risk appetite, ensuring the Company has adequate resources and effective controls are in place in the business. The Board also sets the values and the culture of the Company and has a duty to protect the interests of the policyholders. The Board has a corporate governance framework in place which enables it to oversee the strategic direction of the Company and to hold the executive management accountable for execution. The Board regularly reviews its corporate governance practices to take into account the evolving best market practices and stakeholder interests.

BOARD OF DIRECTORS

The composition of the Board is in line with good corporate governance practices and is governed by the Company's Articles of Association and Board Charter. The roles of the Chairman and the Managing Director are segregated. A non-executive director acts as the Chairman of the Board. The Managing Director is in charge of the day to day running of the business. The current Board is composed of one Executive Director (Managing Director) and nine non-executive Directors including three independent Directors. The Board consists of committed individuals with diverse and complementary skills to ensure that there is sufficient wealth of experience in the Board.

The Directors are given appropriate and timely information enabling them to maintain full and effective control over all strategic, financial, operational and compliance issues. During the period under review and up to the date of this statement, none of the Directors has received any benefit from the Company other than Director's fees and emoluments disclosed in the financial statements and no loans have been advanced to the Directors during this period.

The Board usually holds at least four scheduled Board meetings in a year which all Directors are expected to attend unless there are extraordinary circumstances that prevent them from doing so. In the event that a Director is unable to attend a meeting, he/she is required to inform the Chairman in advance of the meeting and this apology is conveyed at the meeting. As meeting papers are circulated to members in advance of meetings, a Director who is unable to attend is able to raise any questions or make any comment before the meeting and follow up with the Chairman thereafter. Where necessary, efforts are made to facilitate virtual/electronic participation of Directors in meetings which they are physically unable to attend.

Details of the Directors' attendance at the Board and Committee meetings are set out on page 8 of these financial statements.

BOARD COMMITTEES

While the Board has ultimate authority over and is ultimately responsible for oversight of the Company, it has delegated certain duties to Board Committees. It has five Committees all of which are guided by clear terms of reference. The Committees are instrumental in monitoring business operations, systems and internal controls. The Committees are as follows:

(i) **Executive Committee**

The Committee is chaired by Mr. Leon N. Nyachae and its membership comprises one non-executive Director, two independent Directors and the Managing Director. The Committee reviews the Company's operations, strategies, investments, asset liability management, policyholders' protection amongst others. Its main functions include sanction of insurance claims and capital expenditure in excess of the financial limits set for Management. The meetings for this Committee are held quarterly.

(ii) **Nomination and Remuneration Committee:**

The Nomination and Remuneration Committee is chaired by a non-executive independent Director. The other members are two non-executive Directors and the Managing Director. The Committee's main function is to identify and nominate for the approval by the Board, candidates to fill Board vacancies, succession planning of the Board and other senior executives and make recommendations to the Board with regards to any changes and to advise on remuneration.

(iii) **Audit Committee**

The Committee is chaired by an independent Director, Mrs. Elizabeth M. Musyoka and includes three non-Executive Directors and one Independent Director. The Managing Director, Financial Controller and Chief Internal Auditor attend meetings of the Committee as and when necessary. The Committee also meets with the external auditors in accordance with its terms of reference. The Committee meets at least four times in a year.

(iv) **Credit Management Committee**

The Committee is chaired by Mr. Devesh Srivastava, a non-Executive Director and includes the two other non-Executive Directors, one independent Director and the Managing Director. The Committee's terms of reference include reviewing the Credit Policy of the Company, outstanding receivables from the premium debtors and provisioning/write off of bad and doubtful debts, amongst others. The Committee meets at least four times in a year.

(v) **Risk Management Committee**

The Committee is chaired by Mr. M.R. Kumar, a non-Executive Director and includes two other non-Executive Directors, one independent Director and the Managing Director. The terms of reference include reviewing on a continuous basis the potential risks the Company is exposed to, monitoring the system of management of risks and ensuring that the required action is taken by the management to mitigate the impact of risks, amongst others, with the assistance of the Risk Manager of the Company. The Committee meets at least four times in a year.

Total	**10,000,000**	**100.00**

The Company continues to undertake Corporate Social Responsibility activities by promoting various activities among the local communities in which it operates. The Company is committed to the principle of responsible citizenship and makes Corporate Social Responsibility an integral part of its annual business plans. Under its Corporate Social Responsibility (CSR) programs, the Company conducts community support activities every year. Members of staff participated in various activities. The main activities taken up by the company during the year were the following:

a) Payment of fees for needy students.

b) Donations to University of Nairobi Prize giving ceremony

The directors have pleasure in submitting their report together with the audited financial statements for the year ended 31 December 2021, which disclose the state of financial affairs of the Group comprising Kenindia Assurance Company Limited and its subsidiaries: Kenya Pravack Limited, Kenindia Asset Management Limited, and Tanzindia Assurance Company Limited.

PRINCIPAL ACTIVITIES

The Group underwrites all classes of life and non-life insurance risks as defined by the Insurance Act. The Group also provides its customers with asset management solutions for their savings and retirement needs.

RESULTS

	Group	
	2021	**2020**
	KSh'000	**KSh'000**
Group profit before tax	552,477	534,490
Taxation (charge)/credit	323,563	53,456

Non-controlling interest	(11,837)	(28,237)
Net profit for the year transferred to retained earnings	**864,202**	**559,709**

BUSINESS REVIEW

During the year 2021, the total turnover (including pension fund deposits and annuities) of the Group and company increased from Ksh 10.397 billion to Ksh 14.162 billion and for the Company from Ksh 9.842 billion to Ksh 13.500 billion respectively. This was mainly attributed to significant growth in life business. The profit before tax for the Group was Ksh 552.5 million in 2021 and Kshs. 534.5 million in year 2020. The Company recorded profit before tax of Kshs. 497.2 million in 2021 up from Kshs. 411.98 million in 2020 reflecting the effects of increased gross premium in life business, better claims experience in general business, release of expected credit losses under IFRS 9 in the year under review and overall profit position reported by Tanzindia, a subsidiary.

As at 31 December 2021, the net asset position of the Group increased from Ksh 4.812 billion to Ksh 5.554 billion and for the Company from Ksh 4.539 billion to Ksh 5.286 billion respectively.

DIVIDEND

The directors recommend the payment of a dividend of Ksh 75 million which represents Ksh 7.50 per share in respect of the year ended 31 December 2021 (2020: Ksh 50 million representing Ksh 5 per share)
.

EVENTS AFTER THE REPORTING PERIOD

The financial statements were prepared based on management estimates and judgement as at the reporting date.

DIRECTORS

The Board of Directors as at 31st December 2021 is shown on page 1.

DIRECTORS' INDEMNITIES

In line with sound governance practices, the Company maintains Directors' and officers' liability insurance, which gives appropriate cover for legal action, brought against its Directors. The Company has also granted indemnities to each of its Directors and the Secretary to the extent permitted by law.

STATEMENT AS TO DISCLOSURE TO THE COMPANY'S AUDITOR

With respect to each director at the time this report was approved:

a) there is, so far as the Director is aware no relevant audit information of which the Company's auditor is unaware:
b) the Director has taken all the steps that the Director ought to have taken as a director so as to be aware of any relevant audit information and to establish the Company's auditor is aware of that information.

INDEPENDENT AUDITOR

Grant Thornton continues in office in accordance with Section 719 of the Kenyan Companies Act, 2015 and have expressed their interest to continue in office. The Directors monitor the effectiveness, objectivity and independence of the auditors. The Directors also approve the annual audit engagement contract which sets out the terms of the auditor's appointment and the related fees. The Directors recommend their re-appointment.

APPROVAL OF ANNUAL REPORT AND FINANCIAL STATEMENTS

The Report of the Directors was approved by the Board of Directors on 18 March 2022 and signed on its behalf by the Secretary.

By order of the board

For Adili Corporate Services Kenya
Company Secretaries

statement of directors' responsibilities

KENINDIA

The Kenyan Companies Act, 2015 requires the directors to prepare financial statements for each financial year that give a true and fair view of the financial position of the company as at the end of the financial year and of its profit or loss and other comrehensive income for that year. It also requires the directors to ensure that the company keeps proper accounting records that: (a) show and explain the transactions of the company; (b) disclose, with reasonable accuracy, the financial position of the company; and (c) enable the directors to ensure that every financial statement required to be prepared complies with the requirements of the Companies Act, 2015.

The directors accept responsibility for the preparation and presentation of these financial statements in accordance with International Financial Reporting Standards and in the manner required by the Kenyan Companies Act, 2015. They also accept responsibility for:

i) designing, implementing and maintaining such internal control as they determine necessary to enable the presentation of financial statements that are free from material misstatement, whether due to fraud or error;
ii) selecting suitable accounting policies and applying them consistently; and
iii) making accounting estimates and judgements that are reasonable in the circumstances.

Having made an assessment of the company's ability to continue as a going concern, the directors are not aware of any material uncertainties related to events or conditions that may cast doubt upon the company's ability to continue as a going concern.

The directors acknowledge that the independent audit of the financial statements does not relieve them of their responsibilities.

Approved by the board of directors on 18 March 2022 and signed on its behalf by:

report of the consulting actuary

KENINDIA

I have conducted an actuarial valuation of the life assurance business and an actuarial valuation of the general insurance business of Kenindia Assurance Company Limited as at 31 December 2021.

The valuation was conducted in accordance with generally accepted actuarial principles and in accordance with the requirements of the Kenyan Insurance Act.

In completing the actuarial valuation, I have relied upon the audited financial statements of the Company and data and information provided by the Company.

Based on our actuarial valuation, we propose that the company adopt the actuarial liabilities as per our Report on the Actuarial Valuation of the Long-Term Business as at 31 December 2021 and our report on the Actuarial Valuation of General Insurance Technical Liabilities as at 31 December 2021.

Name of Actuary: Gauri Shah, Fellow of the Institute & Faculty of Actuaries - UK, Fellow of the Actuarial Society of Kenya

Gauri Shah

Grant Thornton

TO THE MEMBERS OF KENINDIA ASSURANCE COMPANY LIMITED

Opinion

We have audited the accompanying financial statements of Kenindia Assurance Company Limited (the ''company'') and its subsidiaries (together, the group), set out on pages 9 to 143, which comprises the consolidated and company statement of financial position as at 31st December 2021, statements of comprehensive income, statements of changes in equity, statements of cash flows for the year then ended, and notes, including a summary of significant accounting policies.

In our opinion the accompanying financial statements give a true and fair view of the financial position of the group and company as at 31st December 2021 and of the financial performance and cash flows of the group for the year then ended in accordance with International Financial Reporting Standards and the Kenyan Companies Act, 2015.

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Kenya, and we have fulfilled our ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How the matter was addressed during the audit
Actuarial value of policyholders' liabilities	
The company has significant long term insurance liabilities in both ordinary life and group life classes of business. The company determines the liabilities it would expect in the long term using actuarial valuation methods and per the guidelines issued by the Insurance Regulatory Authority of Kenya (IRA). Determination of the long term insurance liabilities is an estimation process that involves significant judgements and assumptions in relation to the discount rates, mortality rate, inflation bonuses, lapse rates as well as prescribed expenses. We have considered this a key audit matter since estimation of the actuarial value of policyholders' benefit is complex and subjective in nature as it involves use of judgements and assumptions in relation to the discount rate, mortality rate, inflation bonuses, withdrawal rates and initial and subsequent expenses subject to the minimum basis prescribed in the valuation guidelines.	Our audit procedures in this area with the support of our actuarial team included: Assessing the competencies and objectivity as well as verifying the qualifications of the independent external expert engaged by management and approved by the Insurance Regulatory Authority. We reviewed the actuarial report and calculations underlying these provisions, particularly the following areas: a) appropriateness of the methodologies used and that the approach was in accordance with best practice as recommended by IRA;. b) reasonableness of key assumptions; c) sensitivities to key assumptions; d) consistency between valuation periods; and e) accuracy and relevance of the input data used.

Valuation of Insurance Contract Liabilities	
Valuation of these liabilities is highly judgmental and requires a number of assumptions to be made that have high estimation uncertainty. This is particularly for those liabilities that are recognised in respect of claims that have occurred, but have not yet been reported to the company. We considered this a key audit matter owing to the material impact a change in these assumptions and judgement would have on the valuation of these liabilities	Our audit procedures in this area included: evaluating and testing controls around claims handling and reservation process; • performing cut-off procedures to check for any unrecorded claims at the end of the year; • on a sample basis, checking the claims reserved by comparing the estimated amount reserved to documentation such as the assessors report and the discharge voucher; • reviewing the reserving methodology applied focusing on understanding the methodologies applied and examining areas of judgement such as changes in valuation assumptions; and • obtaining legal confirmation of claims in dispute.
Valuation of investment property	
Valuation of investment property is judgmental and involves the use of assumptions that have a high estimation uncertainty. We considered this as a key audit matter owing to the significance of investment property on group and company financial statements	Our audit procedures in this area included: • Assessing the competencies and objectivity as well as verifying the qualifications of the independent external expert engaged by management; • We reviewed the assumptions and methodologies applied by the expert in determining the fair value of investment property.
Valuation of unquoted equity investments	
The Group holds significant unquoted investments comprising investments in unlisted shares measured at fair value through other comprehensive income. The group estimates the fair value of these investments which involves significant judgement and assumptions that have a high estimation uncertainty. We considered this as a key audit matter owing to the significance of these investments on group and company financial statements	Our audit procedures in this area included: • We assessed management's processes and controls for determination of the fair values of investments; • We tested the accuracy of the computations; and • We evaluated the adequacy and appropriateness of disclosures in the financial statements.

Allowance for expected credit losses	
The Group applies IFRS 9 impairment approach in the determination of expected credit losses. This was a key audit matter because significant judgement was involved in determining the credit losses on insurance and re-insurance receivables, loans, deposits with financial institutions among other financial assets. Key areas of judgement included: • the interpretation of the requirements to determine impairment under application of IFRS 9, which is reflected in the group's credit loss model; • identification of exposures with a significant deterioration in credit quality; • assumptions used in the expected credit loss model such as the financial condition of the counterparty, expected future cash flows and forward-looking macroeconomic factors; and • the need to apply additional overlays to reflect current or future external factors that are not appropriately captured by the expected credit loss model.	Our audit procedures in this area included: • We assessed and tested the design and operating effectiveness of controls over the data used to determine impairment losses on financial assets measured at amortised cost; • We assessed the modelling techniques/ methodology used against the requirements of IFRS 9 Financial Instruments; and • We have assessed the reasonableness of modelling assumptions used in determining the expected credit losses. • We have reviewed the adequacy of IFRS 9 disclosures in the financial statements.

Other information

The directors are responsible for the other information. Other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Directors' and Those Charged with Governance for the annual report and financial statements

The directors are responsible for the preparation and fair presentation of the annual report and financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the requirements of the Kenyan Companies Act, 2015, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual report and financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

The directors are responsible for overseeing the Group's and Company's financial reporting processes.

Auditor's responsibilities for the audit of the Group's and Company's financial statements

Our objectives are to obtain reasonable assurance about whether the annual report and financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual report and financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

i) Identify and assess the risks of material misstatement of the annual report and financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
ii) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
iii) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
iv) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the annual report and financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
v) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
vi) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated and separate annual financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other matters prescribed by the Kenyan Companies Act, 2015

In our opinion the information given in the report of the directors on pages 10-11 is consistent with the financial statements.

The engagement partner responsible for the audit resulting in this independent auditor's report was CPA D. V. Shah, P/No 1729.

Cash and cash equivalents at the beginning of the year	247,680	590,528
Increase (decrease) in cash and cash equivalents	455,283	(342,848)
Cash and cash equivalents at the end of the year (Note 32)	**702,963**	**247,680**

1. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

(a) Basis of preparation

The financial statements are prepared on a going concern basis in compliance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB) and in compliance with the requirements of the Kenyan Companies Act, 2015. The financial statements are prepared on the historical cost basis, except for investment properties and certain in-vestments which are carried at fair value, impaired assets at their recoverable amounts and actuarially determined liabilities at their present value. The financial statements are presented in Kenya Shillings (Ksh), rounded to the nearest thousand, which is also the functional Company's currency.

The financial statements comprise the consolidated and company statements of profit or loss, consolidated and company statements of comprehensive income, consolidated and company statements of financial position, consolidated and company statements of changes in equity, consolidated and company statements of cash flows, and explanatory notes. Income and expenses, excluding the components of other comprehensive income, are recognised in profit or loss. Other comprehensive income is recognised in the statement of other comprehensive income and comprises items of income and expenses (including reclassification adjustments) that are not recognised in the statement of profit or loss as required or permitted by IFRS. Reclassification adjustments are amounts reclassified to profit or loss in the current period that were recognised in other comprehensive income in the current or previous periods. Transactions with the owners of the Group in their capacity as owners are recognised in the statement of changes in equity.

The Group presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after reporting date (current) and more than twelve months after reporting date (non-current), is presented in the notes (note 41(iii)).

The preparation of financial statements in conformity with International Financial Reporting Standards requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. It also requires directors to exercise judgement in the process of applying the accounting policies adopted by the Group. Although such estimates and assumptions are based on the directors' best knowledge of the information available, actual results may differ from those estimates. The judgements and estimates are reviewed at the end of each reporting period, and any revisions to such estimates are recognised in the year in which the revision is made. The areas involving the judgements of most significance to the financial statements, and the sources of estimation uncertainty that have a significant risk of resulting in a material adjustment within the next financial year, are disclosed in Note 1 (w) below.

For the purposes of reporting under the Kenyan Companies Act, 2015, the balance sheet in these financial statements is represented by/equivalent to the statement of financial position and the profit and loss account is presented in the statement of profit and loss.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Adoption of new and revised International Financial Reporting Standards (IFRS)

i) New standards and interpretations

The Group applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2020. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Amendments to IFRS 3: Definition of a Business The amendment to IFRS 3 Business Combinations clarifies that to be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that, together, significantly contribute to the ability to create output. Furthermore, it clarifies that a business can exist without including all of the inputs and processes needed to create outputs. These amendments had no impact on the consolidated financial statements of the Group, but may impact future periods should the Group enter into any business combinations.

Amendments to IFRS 7, IFRS 9 and IAS 39 Interest Rate Benchmark Reform The amendments to IFRS 9 and IAS 39 Financial Instruments: Recognition and Measurement provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainty about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument. These amendments have no impact on the consolidated financial statements of the Group as it does not have any interest rate hedge relationships.

Amendments to IAS 1 and IAS 8 Definition of Material The amendments provide a new definition of material that states, "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users. These amendments had no impact on the consolidated financial statements of, nor is there expected to be any future impact to the Group.

Conceptual Framework for Financial Reporting issued on 29 March 2018 The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the IASB in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards. This will affect those entities which developed their accounting policies based on the Conceptual Framework. The revised Conceptual Framework includes some new concepts, updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts. These amendments had no impact on the consolidated financial statements of the Group.

Standards and interpretations effective and adopted in the current year

In the current year, the company has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

i) New standards and interpretations

Interest Rate Benchmark Reform - Phase 2: Amendments to IFRS 4

An insurer applying the temporary exemption from IFRS 9 shall apply the new requirements of IFRS 9 concerning situations where a change in the basis for determining the contractual cash flows of a financial asset or financial liability is required by interest rate benchmark reform.

The effective date of the company is for years beginning on or after January 1, 2021. The company has adopted the amendment for the first time in the 2021 annual report and financial statements. The impact of the amendment is not material.

Interest Rate Benchmark Reform - Phase 2: Amendments to IFRS 7

The amendment sets out additional disclosure requirements related to interest rate benchmark reform.
The effective date of the company is for years beginning on or after January 1, 2021. The company has adopted the amendment for the first time in the 2021 annual report and financial statements. The impact of the amendment is not material.

Interest Rate Benchmark Reform - Phase 2: Amendments to IFRS 9

When there is a change in the basis for determining the contractual cash flows of a financial asset or financial liability that is required by interest rate benchmark reform then the entity is required to apply paragraph B5.4.5 as a practical expedient. This expedient is only available for such changes in basis of determining contractual cash flows.

Additional temporary exemptions from applying specific hedge accounting requirements as well as additional rules for accounting for qualifying hedging relationships and the designation of risk components have been added to hedge relationships specifically impacted by interest rate benchark reform.

The effective date of the company is for years beginning on or after January 1, 2021. The company has adopted the amendment for the first time in the 2021 annual report and financial statements. The impact of the amendment is not material.

Interest Rate Benchmark Reform - Phase 2: Amendments to IFRS 16

If there is a lease modification as a result of the interest rate benchmark reform, then as a practical expedient the lessee is required to apply paragraph 42 of IFRS 16 to account for the changes by remeasuring the lease liability to reflect the revised lease payment. The amendment only applies to modifications as a result of the interest rate benchmark reform.

The effective date of the company is for years beginning on or after January 1, 2021. The impact of the amendment is not material.

Interest Rate Benchmark Reform - Phase 2: Amendments to IAS 39

Temporary exemptions from applying specific hedge accounting requirements as well as additional rules for accounting for qualifying hedging relationships and the designation of financial items as hedged items have been added to hedge relationships specifically impacted by interest rate benchmark reform.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

i) New standards and interpretations

The effective date of the company is for years beginning on or after January 1, 2021.
The company has adopted the amendment for the first time in the 2021 annual report and financial statements.
The impact of the amendment is not material.

COVID-19 - Related Rent Concessions - Amendment to IFRS 16

The COVID-19 pandemic has resulted in an amendment to IFRS 16 Leases. Lessees may elect not to assess whether a rent concession that meets the conditions in paragraph 46B is a lease modification. If this election is applied, then any change in lease payments must be accounted for in the same way as a change would be accounted for it were not a lease modification. This practical expedient only applies to rent concessions occurring as a direct consequence of the COVID-19 pandemic and only if:

- ` the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- any reduction in lease payment affects only payments originally due on or before 30 June 2022 and
- there is no substantive change to other terms and conditions of the lease.

The effective date of the company is for years beginning on or after June 1, 2020.
The company has adopted the amendment for the first time in the 2021 annual report and financial statements.
The impact of the amendment is not material.

Standards and interpretations not yet effective

The company has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the company's accounting periods beginning on or after January 1, 2022 or later periods:

Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

If a parent loses control of a subsidiary which does not contain a business, as a result of a transaction with an associate or joint venture, then the gain or loss on the loss of control is recognised in the parents' profit or loss only to the extent of the unrelated investors' interest in the associate or joint venture. The remaining gain or loss is eliminated against the carrying amount of the investment in the associate or joint venture. The same treatment is followed for the measurement to fair value of any remaining investment which is itself an associate or joint venture. If the remaining investment is accounted for in terms of IFRS 9, then the measurement to fair value of that interest is recognised in full in the parents' profit or loss.

The effective date of the amendment is to be determined by the IASB.
It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) New standards and interpretations (continued)

Deferred tax related to assets and liabilities arising from a single transaction - Amendments to IAS 12

The amendment adds an additional requirement for transactions which will not give rise to the recognition of a deferred tax asset or liability on initial recognition. Previously, deferred tax would not be recognised on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting profit or loss. The additional requirement provides that the transaction, at the time of the transaction must not give rise to equal taxable and deductible temporary differences.

The effective date of the company is for years beginning on or after January 1, 2023.
It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.
The company expects to adopt the amendment for the first time in the 2021 annual report and financial statements.

Disclosure of accounting policies: Amendments to IAS 1 and IFRS Practice Statement 2.

IAS 1 was amended to require that only material accounting policy information shall be disclosed in the annual report and financial statements. The amendment will not result in changes to measurement or recognition of financial statement items, but management will undergo a review of accounting policies to ensure that only material accounting policy information is disclosed.

The effective date of the company is for years beginning on or after January 1, 2023.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

Definition of accounting estimates: Amendments to IAS 8

The definition of accounting estimates was amended so that accounting estimates are now defined as "monetary amounts in annual report and financial statements that are subject to measurement uncertainty."

The effective date of the company is for years beginning on or after January 1, 2023.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) New standards and interpretations (continued)

Classification of Liabilities as Current or Non-Current - Amendment to IAS 1

The amendment changes the requirements to classify a liability as current or non-current. If an entity has the right at the end of the reporting period, to defer settlement of a liability for at least twelve months after the reporting period, then the liability is classified as non-current.

If this right is subject to conditions imposed on the entity, then the right only exists, if, at the end of the reporting period, the entity has complied with those conditions.

In addition, the classification is not affected by the likelihood that the entity will exercise its right to defer settlement. Therefore, if the right exists, the liability is classified as non-current even if management intends or expects to settle the liability within twelve months of the reporting period. Additional disclosures would be required in such circumstances.

The effective date of the company is for years beginning on or after January 1, 2023.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

IFRS 17 Insurance Contracts

The IFRS establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts issued.

The effective date of the company is for years beginning on or after January 1, 2023.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

Annual Improvement to IFRS Standards 2018-2020: Amendments to IFRS 1

A subsidiary that uses the cumulative translation differences exemption, may elect in its financial statements, to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to IFRS if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary.

The effective date of the company is for years beginning on or after January 1, 2023.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) New standards and interpretations (continued)

Reference to the Conceptual Framework: Amendments to IFRS 3

The amendment makes reference to the Conceptual Framework for Financial Reporting issued in 2018 rather than to the IASC's Framework for the Preparation and Presentation of Financial Statements. The amendment specifically points to the treatment of liabilities and contingent liabilities acquired as part of a business combination, and which are in the scope of IAS 37 Provisions, Continent Liabilities and Contingent Assets or IFRIC 21 Levies. It clarifies that the requirements of IAS 37 or IFRIC 21 should be applied to provisions, contingent liabilities or levies to determine if a present obligation exists at the Acquisition date. The amendment further clarifies that contingent assets of acquirees share not be recognised as part of the business combination.

The effective date of the company is for years beginning on or after January 1, 2022.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

Annual Improvement to IFRS Standards 2018-2020: Amendments to IFRS 9

The amendment concerns fees in the '10 per cent' test for derecognition of financial liabilities. Accordingly, in determining the relevant fees, only fees paid or received between the borrower and the lender are to be included.

The effective date of the company is for years beginning on or after January 1, 2022.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

Property, Plant and Equipment: Proceeds before Intended Use: Amendments to IAS 16

The amendment relates to examples of items which are included in the cost of an item of property, plant and equipment. Prior to the amendment, the costs of testing whether the asset is functioning properly were included in the cost of the asset after deducting the net proceeds of selling any items which were produced during the test phase. The amendment now requires that any such proceeds and the cost of those items must be included in profit or loss in accordance with the related standards. Disclosure of such amounts in now specifically required.

The effective date of the company is for years beginning on or after January 1, 2022.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

Onerous Contracts - Cost of Fulfilling a Contract: Amendments to IAS 37

The amendment defined the costs that are included in the cost of fulfilling a contract when determining the amount recognised as an onerous contract. It specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. These are both the incremental costs of fulfilling the contract as well as an allocation of other costs that relate directly to fulfilling contracts (for example depreciation allocation).

The effective date of the company is for years beginning on or after January 1, 2022.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) New standards and interpretations (continued)

Annual Improvement to IFRS Standards 2018-2020: Amendments to IAS 41

"Taxation" has been removed from the list of cash flows excluded from the fair value determination of biological assets.

The effective date of the company is for years beginning on or after January 1, 2022.

It is unlikely that the amendment will have a material impact on the company's annual report and financial statements.

c) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group (Company and its subsidiaries) as at 31 December each year. Subsidiary companies are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases. The financial statements of the subsidiaries are prepared for the same reporting year as the parent company, using consistent accounting policies. The Group companies are as set out in note 17.

The group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration to be transferred by the group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IFRS 9 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the statement of profit or loss.

All intra-group balances, transactions, income and expenses and profits and losses, resulting from intra-group transactions and dividends, are eliminated in full.

KI-REPORT-2021-5.indd 46 26/05/2022 14:39

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

c) Basis of consolidation (continued)

Losses within a subsidiary are attributed to the non-controlling interest even if this results in a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it;

i) Derecognises the assets and liabilities of the subsidiary
ii) Derecognises the carrying amount of any non-controlling interest
ii) Derecognises the cumulative translation differences recorded in equity
iv) Recognises the fair value consideration received
v) Recognises the fair value of any investment retained
vi) Recognises any surplus or deficit in profit or loss
vii) Reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate.

d) Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable for the sale of services, excluding discounts, rebates, and value added taxes or other taxes. Sale of services is recognised upon performance of the service and customer acceptance based on the proportion of actual service rendered to the total services to be provided.

The following specific criteria must also be met before revenue is recognised:

Gross premiums

Gross recurring premiums on life are recognised as revenue when payable by the policyholder. For single premium, business revenue is recognised on the date on which the policy is effective. Gross general insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the accounting period and are recognised on the date on which the policy commences.

Net premium income is recognised on assumption of risks, and includes estimates of premiums due but not yet received, less an allowance for cancellations and less unearned premium.

Unearned premiums represent the proportion of the premiums written in periods up to the accounting date that relates to the unexpired terms of policies in force at the reporting date, and is computed using the 1/24 method in general business.

Reinsurance premiums

Gross reinsurance premiums on life are recognised as an expense when payable or on the date on which the policy is effective. Gross general reinsurance premiums written comprise the total premiums payable for the whole cover provided by contracts entered into during the period and are recognised on the date on which the policy incepts.

Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks-attaching contracts and over the term of the reinsurance contract for losses-occurring contracts.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Revenue Recognition (continued)

Commission income and fees

Insurance contract policyholders are charged for policy administration services, investment management services, surrenders and other contract fees. These fees are recognised as revenue over the period in which the related services are performed. Commission income is recognized in the period in which they are earned.

Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the effective interest rate method. Fees and commissions that are an integral part of the effective yield of the financial asset or liability are recognised as an adjustment to the effective interest rate of the instrument. Investment income also includes dividend income which is recognised when the right to receive the payment is established. For listed securities, this is the date the security is listed as ex dividend.

Rental income

Rental income arising from operating leases on investment properties is accounted for on a straight line basis over the lease period.

Realised gains and losses

Realised gains and losses recorded in the statement of profit or loss on investments include gains and losses on the financial assets and investment properties. Gains and losses on the sale of investments are calculated as the difference between net sales proceeds and the original or amortised cost and are recorded on occurrence of the sale transaction.

e) Benefits, claims and expense recognition

Gross benefits and claims

Gross benefits and claims for life insurance contracts include the cost of all claims arising during the year including internal and external claims handling costs that are directly related to the processing and settlement of claims as well as changes in the gross valuation of insurance contract liabilities. Death claims and surrenders are recorded on the basis of notifications received. Maturities and annuity payments are recorded when due.

General insurance and health claims include all claims that have occurred during the year, whether reported or not, related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

Claims incurred

Claims incurred comprise claims paid in the year and changes in the provision for outstanding claims. Claims paid represent all payments made during the year, whether arising from events during that or earlier years. Outstanding claims represent claims arising from incidents occurring prior to the accounting date and not settled, and are computed on the basis of the best information available at the time the records for the period are closed and include provisions for claims incurred but not reported (IBNR). IBNR is computed based on certain minimum percentages of gross premium written on each class of business, as stipulated by the insurance industry regulator. This amount is included in the outstanding claims as at year end.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

e) Benefits, claims and expense recognition (continued)

Claims incurred (continued)

Claims arising on maturing policies are recognised when the claim becomes due for payment. Death claims are accounted for on notification. Surrenders are accounted for on payment.

Outstanding claims in short term business are not discounted.

Reinsurance claims recoverable

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

Policyholder benefits

Policyholder benefits incurred comprise benefits paid in the year and changes in the provision for insurance contract liabilities. Benefits paid represent all payments made during the year, whether arising from events during that or earlier years. Insurance contract liabilities represent the estimated ultimate cost of settling all benefits accruing to policyholders and are discounted to the present value.

f) Product classification

Insurance contracts are those contracts when the Group (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Group determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Investment contracts are those contracts that transfer significant financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of price or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can however be reclassified as insurance contracts after inception if insurance risk becomes significant.

Investment contracts are further classified as being either with or without Discretionary Participation Feature (DPF). DPF is a contractual right to receive, as a supplement to guaranteed benefits, additional benefits that are:

i) Likely to be a significant portion of the total contractual benefits
ii) The amount or timing of which is contractually at the discretion of the issuer
iii) That are contractually based on:

- The performance of a specified pool of contracts or a specified type of contract
- Realised and or unrealised investment returns on a specified pool of assets held by the issuer
- The profit or loss of the company, fund or other entity that issues the contract

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

g) Reinsurance

The Group cedes insurance risk in the normal course of business for all of its businesses. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurer's policies and are in accordance with the related reinsurance contract. Reinsurance assets consist of the amount due from reinsurers for claims submitted as well as the portion of the current long term insurance that is ceded to the reinsurers on the basis of the reinsurance agreement (treaty proportional or facultative).

Reinsurance assets are reviewed for impairment at each reporting date or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Group may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Group will receive from the reinsurer. The impairment loss is recorded in the statement of profit or loss. Gains or losses on buying reinsurance are recognised in the statement of profit or loss immediately at the date of purchase and are not amortised.
Ceded reinsurance arrangements do not relieve the Group from its obligations to policyholders.

The Group also assumes reinsurance risk in the normal course of business for life insurance and non-life insurance contracts where applicable. Premiums and claims on assumed reinsurance are recognised as revenue or expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the related reinsurance contract.

Premiums and claims are presented on a gross basis for both ceded and assumed reinsurance.

Reinsurance assets or liabilities are derecognised when the contractual rights are extinguished or expire or when the contract is transferred to another party.

Reinsurance contracts that do not transfer significant insurance risk are accounted for directly through the statement of financial position. These are deposit assets or financial liabilities that are recognised based on the consideration paid or received less any explicit identified premiums or fees to be retained by the reinsured. Investment income on these contracts is accounted for using the effective interest rate method when accrued.

h) Insurance receivables

Insurance receivables are recognised when due and measured on initial recognition at the fair value of the consideration received or receivable. Subsequent to initial recognition, insurance receivables are measured at amortised cost, using the effective interest rate method. The carrying value of insurance receivables is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the statement of profit or loss.

Insurance receivables are recognised when the recognition criteria for financial assets, as described in note (u), has been met.

i) Policyholder benefits

Policy holder benefits incurred comprise benefits paid in the year and changes in the provision for insurance contract liabilities. Benefits paid represent all payments made during the year, whether arising from events during that or earlier years. Insurance contract liabilities represent the estimated ultimate cost of settling all benefits accruing to policy holders and are discounted to the present value.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Deposit administration contracts

The Group administers the funds of a number of retirement benefit schemes. The liability of the Group to the schemes is measured at fair value and is included within the statement of financial position. Deposits, withdrawals and investments returns are recorded directly as an adjustment to the liability in the statement of financial position and are not recognised as gross premium and investments income in the consolidated statement of profit or loss.

k) Expenses

Expenses are recognised in the statement of profit or loss when decrease in future economic benefits related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably. When economic benefits are expected to arise over several accounting periods and the association with income can only be broadly or indirectly determined expenses are recognised in the statement of profit or loss on the basis of systematic and rational allocation procedures.

This is often necessary in recognising the equipment associated with the using up of assets such as property, plant and equipment. In such cases the expense is referred to as a depreciation or amortisation. These allocation procedures are intended to recognise expenses in the accounting periods in which the economic benefits associated with these items are consumed or expire.

An expense is recognised immediately in the statement of profit or loss when expenditure produces no future economic benefits or when, and to the extent that, future economic benefits do not qualify, or cease to qualify, for recognition in the statement of financial position as an asset.

l) Property and equipment

All categories of property and equipment are initially recognised at cost. Cost includes expenditure directly attributable to the acquisition of the assets. Subsequent costs (including replacement costs) are included in the asset's carrying amount or recognised as a separate asset, as appropriate, when incurred and only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Repairs and maintenance expenses are charged to the statement of profit or loss in the year in which they are incurred.

Buildings are subsequently carried at a revalued amount, based on annual valuations by external independent valuers, less accumulated depreciation and accumulated impairment losses. All other items of property and equipment are subsequently carried at cost, excluding the cost of day-to-day servicing, less accumulated depreciation and accumulated impairment losses.

Increases in the carrying amount arising on revaluation on buildings are recognised in other comprehensive income and accumulated in equity under the heading of revaluation surplus. Decreases that offset previous increases of the same asset are recognised in other comprehensive income. All other decreases are charged to the profit and loss account. Annually, the difference between the depreciation charge based on the revalued carrying amount of the asset charged to the profit and loss account and depreciation based on the asset's original cost (excess depreciation) is transferred from the revaluation surplus reserve to retained earnings.

Depreciation of an asset begins when it is available for use, that is, when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale (or included in a disposal group that is classified as held for sale) and the date that the asset is derecognised. Therefore, depreciation does not cease when the asset becomes idle or is retired from active use unless the asset is fully depreciated.

KI-REPORT-2021-5.indd 51 26/05/2022 14:39

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

l) Property and equipment (continued)

Depreciation is calculated using the reducing balance basis to write down carrying values of the assets over their useful lives at the following annual rates:

Furniture, fixtures and office equipment	12.5%
Computer equipment, duplicators and copies	30%
Motor vehicles	25%

The assets' residual values, and useful lives and method of depreciation are reviewed, and adjusted if appropriate, at each financial year end and adjusted prospectively, if appropriate. Impairment reviews are performed when there are indicators that the carrying amount may not be recoverable. Impairment losses are recognised in the statement of profit or loss as an expense. An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset or disposal. Any gain or loss on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the statement of profit or loss in the year the item is derecognised.

m) Investment properties

Investment properties comprise buildings and parts of buildings held to earn rentals or for capital appreciation or both. Investment properties are initially measured at cost, including the transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the cost of day-to-day servicing of an investment property. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Fair value is the amount for which an asset could be exchanged between knowledgeable, willing parties in an arm's length transaction. Fair value specifically excludes an estimated price inflated or deflated by special terms or circumstances such as typical financing, sale and lease back arrangements, special consideration or concessions granted by anyone associated with the sale.

The Group determines fair value without any deductions for transactional costs it may incur on sale or other disposal. Gains or losses arising from changes in the fair values of investment properties are included in the statement of profit or loss in the year in which they arise.

Fair values are evaluated annually by an accredited external independent valuer. Subsequent expenditure on investment property where such expenditure increases the future economic value in excess of the original assessed standard of performance is added to the carrying amount of the investment property. All other subsequent expenditure is recognised as an expense in the year in which it is incurred.

Investment properties are derecognised either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. On disposal or retirement of an investment property, the difference between the disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss in the year of disposal or retirement.

Transfers are made to or from investment property only when there is a change in use evidenced by the end of owner-occupation, commencement of an operating lease to another party or completion of construction or development. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner- occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use. When the Group completes the construction or development of a self-constructed investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognised in the statement of profit or loss.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

n) Intangible assets

Acquired computer software is capitalised on the basis of the costs incurred to acquire and bring to use, the specific software. Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets are assessed to be finite. Intangible assets with finite lives are amortised over the useful economic life at 30 percent per annum, using the reducing balance method. Amortisation begins when the asset is available for use, that is, when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Amortisation ceases at the earlier of the date that the asset is classified as held for sale (or included in a disposal group that is classified as held for sale) and the date that the asset is derecognised.

Intangible assets with finite lives are assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit or loss in the expense category consistent with the function of the intangible asset.

Intangible assets are derecognised on disposal or when no future economic benefits are expected from its use or disposal.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

o) Leases

The company assesses whether a contract is, or contains a lease, at the inception of the contract.
A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the company has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

In circumstances where the determination of whether the contract is or contains a lease requires significant judgement, the relevant disclosures are provided in the significant judgments and sources of estimation uncertainty section of these accounting policies.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

o) Leases (continued)

Company as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the company is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the company recognises the lease payments as an operating expense (note 8) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated to each lease component on the basis of the relative stand-alone prices of the lease components and the aggregate stand-alone price of the non-lease components (where non-lease components exist).

However as an exception to the preceding paragraph, the company has elected not to separate the non-lease components for leases of land and buildings.

Details of leasing arrangements where the company is a lessee are presented in note 38 Leases (company as lessee).

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the company under residual value guarantees;
- the exercise price of purchase options, if the company is reasonably certain to exercise the option;
- lease payments in an optional renewal period if the company is reasonably certain to exercise an extension option; and
- penalties for early termination of a lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line item on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance costs (note 5).

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

o) Leases (continued)

Lease liability (continued)

The company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;

- there has been a change in the assessment of whether the company will exercise a purchase, termination or extension option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;

- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);

- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;

- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Lease payments included in the measurement of the lease liability comprise the following:

- the initial amount of the corresponding lease liability;
- any lease payments made at or before the commencement date;
- any initial direct costs incurred;
- any estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, when the company incurs an obligation to do so, unless these costs are incurred to produce inventories; and
- less any lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

o) Leases (continued)

Right-of-use assets (continued)

For right-of-use assets which are depreciated over their useful lives, the useful lives are presented in the following table:

Item	Depreciation method	Average useful life
Lease rentals	Straight line	5

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate. Each part of a right-of-use asset with a cost that is significant in relation to the total cost of the asset is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Company as lessor

Leases for which the company is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases. Lease classification is made at inception and is only reassessed if there is a lease leases are classified as operating leases. modification.

When the company is an intermediate lessor, it accounts for the head lease and the sublease as two separate contracts. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the company applies the exemption described previously, then it classifies the sub-lease as an operating lease.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated by applying IFRS 15.

Operating leases

Lease payments from operating leases are recognised on a straight-line basis over the term of the relevant lease, or on another systematic basis if that basis is more representative of the pattern in which the benefits form the use of the underlying asset are diminished. Operating lease income is included in other operating income (note).

Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and are expensed over the lease term on the same basis as the lease income.

Modifications made to operating leases are accounted for as a new lease from the effective date of the modification. Any prepaid or accrued lease payments relating to the original lease are treated as part of the lease payments of the new lease.

Any contingent rents are expensed in the period they are incurred.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

p) Foreign currency transactions

The Group's consolidated financial statements are presented in Ksh which is also the Company's functional currency. That is the currency of the primary economic environment in which Kenindia Assurance Company Limited operates. Each company in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

i) Transactions and balances

Transactions in foreign currencies are initially recorded at the functional currency rate prevailing at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. All differences are taken to the statement of profit or loss with the exception of differences on foreign monetary items that form part of a net investment in a foreign operation. These are recognised in other comprehensive income until the disposal of the net investment, at which time they are recognised in the statement of profit or loss. Tax changes and credits attributable to exchange differences on these items are also recorded in other comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

ii) Group companies

The assets and liabilities of foreign operations are translated into Kenya Shillings at the rate of exchange prevailing at the reporting date and their statement of profit or loss are translated at exchange rates prevailing at the date of the transactions. The exchange differences arising on the translation are recognised in other comprehensive income. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in the statement of profit or loss.

q) Taxation

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, by the reporting date in the countries where the Group operates and generates taxable income. Current income tax assets and liabilities also include adjustments for tax expected to be payable or recoverable in respect of previous periods.

Current income tax relating to items recognised directly in equity or other comprehensive income is recognised in equity or other comprehensive income and not in the statement of profit or loss.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. The income tax charge is analysed between tax in respect of policyholders' returns and the balance which represents the tax on equity holders' returns. The income tax charge in respect of policyholders' returns reflects the movement in current and deferred income tax recognised in respect of those items of income, gains and expenses, which inure to the benefit of policyholders.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

q) Taxation (continued)

Deferred tax

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

q) Taxation (continued)

Sales taxes and premium taxes

Revenues, expenses and assets and liabilities are recognised net of the amount of sales taxes and premium taxes except when:

- the sales or premium tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the sales tax is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable,
- receivables and payables that are stated with the amount of sales or premium tax included.

Outstanding net amounts of sales or premium tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

r) Employee entitlements

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the liability for annual leave as a result of services rendered by employees up to the statement of financial position.

s) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit or loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

t) Retirement benefits obligations

The company operates a defined contribution pension scheme for all its employees, the assets of which are held in trustee administered funds. The retirement plan is funded by payments from both employees and the company.

The company also contributes to a statutory defined contribution pension scheme, the National Social Security Fund (NSSF). Contributions are determined by the local statute and currently limited to Ksh 200 per employee per month.

The company's contributions to the defined contribution pension scheme are charged to statement of profit or loss in the year to which they relate.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

u) Financial instruments

Initial recognition and measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i) Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

u) Financial instruments (continued)

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost includes trade receivables, and loan to a related party such as subsidiary.

Financial assets at fair value through OCI (debt instruments)

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the statement of profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in OCI. Upon derecognition, the cumulative fair value change recognised in OCI is recycled to profit or loss.

The Group's debt instruments at fair value through OCI includes investments in quoted debt instruments.

Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Group elected to classify irrevocably its non-listed equity investments under this category.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised as other income in the statement of profit or loss when the right of payment has been established.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

u) Financial instruments (continued)

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired Or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either

(a) the Group has transferred substantially all the risks and rewards of the asset, or

(b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Group has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment

Further disclosures relating to impairment of financial assets are also provided in the following notes: • Disclosures for significant assumptions Note 1w.

• Trade/Premium receivables, including contract assets Note 22

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

u) Financial instruments (continued)

Impairment (continued)

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For debt instruments at fair value through OCI, the Group applies the low credit risk simplification. At every reporting date, the Group evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the internal credit rating of the debt instrument. In addition, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group's debt instruments at fair value through OCI comprise solely of quoted bonds that are graded in the top investment category (Very Good and Good) by the Good Credit Rating Agency and, therefore, are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from the Good Credit Rating Agency both to determine whether the debt instrument has significantly increased in credit risk and to estimate ECLs.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

ii) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings (bank overdrafts) and payables.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings (bank overdraft) and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables and loans and borrowings including bank overdrafts.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost (loans and borrowings)

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

u) Financial instruments (continued)

Financial liabilities at fair value through profit or loss

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. However, the Group has not entered into hedge relationships.

Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Group has not designated any financial liability as at fair value through profit or loss.

Financial liabilities at amortised cost (loans and borrowings including bank overdraft)

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

This category generally applies to interest-bearing loans and borrowings (including bank overdraft).

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

y) Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use.

The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or cash generating unit (CGU) exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

Impairment losses of continuing operations are recognised in the statement of profit or loss in those expense categories consistent with the function of the impaired asset.

For assets, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss.

w) Significant Accounting Judgements and Estimates

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations and assumptions, which have the most significant effect on the amounts recognised in the financial statements.

Operating lease commitments – Group as a lessor

The Group has entered into commercial property leases on its investment property portfolio. The Group, as a lessor, has determined, based on an evaluation of the terms and conditions of the arrangements, that it retains all the significant risks and rewards of ownership of these properties and so accounts for them as operating leases.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

w) Significant Accounting Judgements and Estimates (continued)

Product classification between Insurance and Investment contracts

The Group uses judgement to distinguish between insurance and investment contracts for its life products.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Valuation of insurance contract liabilities

Life insurance contract liabilities

The liability for life insurance contracts is either based on current assumptions or on assumptions established at inception of the contract, reflecting the best estimate at the time increased with a margin for risk and adverse deviation. All contracts are subject to a liability adequacy test, which reflect management's best current estimate of future cash flows.

The main assumptions used relate to mortality, morbidity, longevity, investment returns, expenses, lapse and surrender rates and discount rates. The Group bases mortality and morbidity on standard industry mortality tables which reflect historical experiences, adjusted when appropriate to reflect the Group's unique risk exposure, product characteristics, target markets and own claims severity and frequency experiences. For those contracts that insure risk related to longevity, prudent allowance is made for expected future mortality improvements as well as wide ranging changes to life style, could result in significant changes to the expected future mortality exposure.

Assumptions on future expense are based on current expense levels, adjusted for expected expense inflation if appropriate. Lapse and surrender rates are based on the Group's historical experience of lapses and surrenders. Discount rates are based on current industry risk rates, adjusted for the Group's own risk exposure.

The carrying value at the reporting date of life insurance liabilities is as follows: Ksh 150,903,000 (2020: Ksh 145,904,000) for insurance liabilities and Ksh 15,663,432,000 (2020: Ksh 12,100,720,000) for actuarial value of policy holders' liabilities.

Non-life insurance (which comprises general insurance and healthcare) contract liabilities

For non-life insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the reporting date and for the expected ultimate cost of claims incurred but not yet reported at the reporting date (IBNR). It can take a significant period of time before the ultimate claims cost can be established with certainty and for some type of policies, IBNR claims form the majority of the liability in the statement of financial position.

The key variables include frequency of claims, average claim costs, inflation and average handling costs and are covered in detail under note 40.

Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

w) Significant Accounting Judgements and Estimates (continued)

Non-life insurance (which comprises general insurance and healthcare) contract liabilities (continued)

Large claims are usually separately addressed, by being reserved at the face value of loss adjuster estimates.

Similar judgements, estimates and assumptions are employed in the assessment of adequacy of provisions for unearned premium. Judgement is also required in determining whether the pattern of insurance service provided by a contract requires amortisation of unearned premium on a basis other than time apportionment.

The carrying value at the reporting date of non-life insurance liabilities is as follows: For Group Ksh 5,806,603,000 (2019: Ksh 5,587,361,000) and for Company Ksh 5,161,069,000 (2019: Ksh 4,526,345,000).

(b) Fair value of financial assets determined using valuation techniques

Where the fair values of financial assets recorded on the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of discounted cash flows model and/or mathematical models. The inputs to these models are derived from observable market data where possible, but where observable market data are not available, judgement is required to establish fair values.

For discounted cash flow analysis, estimated future cash flows and discount rates are based on current market information and rates applicable to financial instruments with similar yields, credit quality and maturity characteristics. Estimated future cash flows are influenced by factors such as economic conditions (including country specific risks), concentrations in specific industries, types of instruments or currencies, market liquidity and financial conditions of counterparties. Discount rates are influenced by risk free interest rates and credit risk.

Changes in assumptions about these factors could affect the reported fair value of financial instruments.

(c) Deferred tax assets and liabilities

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Group establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits, together with future tax planning strategies.

Details on deferred taxes are disclosed in Note 29.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

w) Significant Accounting Judgements and Estimates (continued)

(d) Property and equipment and intangible assets

Critical estimates are made by the directors in determining depreciation and amortisation rates for property and equipment and intangible assets. The rates used are set out in the accounting policy (l) and (n) above.

(e) Provision for expected credit losses

Provision for expected credit losses of trade receivables and contract assets.The Group uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geography, product type, customer type and rating, and coverage by letters of credit and other forms of credit insurance).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Group's trade receivables and contract assets is disclosed in Note 21.

x) Dividends

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by the Group's shareholders. Interim dividends (if any) are deducted from equity when they are paid.

Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting date.

y) Insurance payables

Insurance payables are recognised when due and measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest rate method.

Derecognition of insurance payables

Insurance payables are derecognised when the obligation under the liability is discharged, cancelled or expired.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

z) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less in the statement of financial position.

For the purpose of the consolidated and company's statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts (if any).

aa) Share capital

The Group has issued ordinary shares that are classified as equity. Incremental external costs that are directly attributable to the issue of these shares are recognised in equity, net of tax.

ab) Events after the reporting date

The financial statements are adjusted to reflect events that occurred between the reporting date and the date when the financial statements are authorised for issue, provided they give evidence of conditions that existed at the reporting date. Events that are indicative of conditions that arose after the reporting date are disclosed, but do not result in an adjustment of the financial statements themselves.

ac) Insurance contract liabilities

Life insurance contract liabilities

Life insurance liabilities are recognised when contracts are entered into and premiums are charged. These liabilities are measured by using the net premium method. The liability is determined as the sum of the discounted value of the expected future benefits, claims handling and policy administration expenses, policyholder options and guarantees and investment income from assets backing such liabilities, which are directly related to the contract, less the discounted value of the expected theoretical premiums that would be required to meet the future cash outflows based on the valuation assumptions used. The liability is either based on current assumptions or calculated using the assumptions established at the time the contract was issued, in which case a margin for risk and adverse deviation is generally included.

A separate reserve for longevity may be established and included in the measurement of the liability. Furthermore, the liability for life insurance contracts comprises the provision for unearned premiums and unexpired risks, as well as for claims outstanding, which includes an estimate of the incurred claims that have not yet been reported to the Group.

Adjustments to the liabilities at each reporting date are recorded in the statement of profit or loss. Profits originated from margins of adverse deviations on run-off contracts, are recognised in the statement of profit or loss over the life of the contract, whereas losses are fully recognised in the statement of profit or loss during the first year of run-off. The liability is derecognised when the contract expires, is discharged or is cancelled.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

ac) Insurance contract liabilities (continued)

Life insurance contract liabilities (continued)

At each reporting date, an assessment is made of whether the recognised life insurance liabilities are adequate, by using an existing liability adequacy test. The liability value is adjusted to the extent that it is insufficient to meet future benefits and expenses. In performing the adequacy test, current best estimates of future contractual cash flows, including related cash flows such as claims handling and policy administration expenses, policyholder options and guarantees, as well as investment income from assets backing such liabilities, are used. A number of valuation methods are applied, including discounted cash flows. Aggregation levels and the level of prudence applied in the test are consistent with IFRS 4 (Insurance Contracts) requirements. To the extent that the test involves discounting of cash flows, the interest rate applied may be based on management's prudent expectation of current market interest rates. Any inadequacy is recorded in the statement of profit or loss, by establishing a technical reserve for the remaining loss. In subsequent periods, the liability for a block of business that has failed the adequacy test is based on the assumptions that are established at the time of the loss recognition. Impairment losses resulting from liability adequacy testing can be reversed in future years if the impairment no longer exists.

Non-life insurance (which comprises general insurance and healthcare) contract liabilities

Non-life insurance contract liabilities are recognised when contracts are entered into and premiums are charged. These liabilities are known as the outstanding claims provision, which are based on the estimated ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not, together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore the ultimate cost of these cannot be known with certainty at the reporting date. The liability is calculated at the reporting date using actual claims data. The liability is not discounted for the time value of money. No provision for equalisation or catastrophe reserves is recognised. The liabilities are derecognised when the contract expires, is discharged or is cancelled.

The provision for unearned premiums represents premiums received for risks that have not yet expired. Generally the reserve is released over the term of the contract and is recognised as premium income. At each reporting date the Group reviews its unexpired risk and a liability adequacy test is performed to determine whether there is any overall excess of expected claims over unearned premiums. This calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant non-life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums is inadequate, the deficiency is recognised in the statement of profit or loss by setting up a provision for liability adequacy. There was no deficiency noted at the reporting date.

ad) Off-setting

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously. Income and expenses will not be offset in the consolidated statement of profit or loss unless required or permitted by any accounting standard or interpretation, as specifically disclosed in the accounting policies of the Group.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

ae) Statutory reserve

The statutory reserve represents a reserve maintained within the long term assurance business and represents amounts recommended for transfer by the actuary from actuarial valuation as required by the Kenyan Insurance Act.

Transfers into the statutory reserve are processed through the statement of changes in equity. Transfers from the statutory reserve relates to amounts on the life assurance business which is distributable as dividends upon the recommendation of the actuary.

af) Deferred acquisition costs (DAC)

Those direct and indirect costs incurred during the financial period arising from acquiring or renewing of insurance contracts, are deferred to the extent that these costs are recoverable out of future premiums from insurance contract. All other acquisition costs are recognised as an expense when incurred.

Subsequent to initial recognition, DAC for general insurance are amortised over the period in which the related revenues are earned. The deferred acquisition costs for reinsurers are amortised in the same manner as the underlying asset amortisation and is recorded in the statement of profit or loss.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method and are treated as a change in an accounting estimate.

An impairment review is performed at each reporting date or more frequently when an indication of impairment arises. When the recoverable amount is less than the carrying value, an impairment loss is recognised in the statement of profit or loss.

DACs are also considered in the liability adequacy test for each reporting period. DACs are derecognised when the related contracts are either settled or disposed of.

2. Premium earned

(a) Gross earned premium income

The company's insurance business is organised into two main divisions, short term insurance business and long term assurance business. Long term assurance business comprises life assurance business and deposit administration business. Life assurance business relates to the underwriting of risks relating to death of an insured person, and includes contracts subject to the payment of premiums for a term dependent on the termination or continuance of the life of an insured person. Short term insurance business relates to all other categories of general insurance business written by the company, analysed into several sub-classes of business based on the nature of the assumed risks. Approximately 82% of the Group's business is generated in Kenya.

The premium income of the Group and the Company can be analysed between the main classes of business as shown below

At end of year (Short-term business)	6,000,000	6,000,000	600,000	600,000
At start of year (Long-term business)	4,000,000	1,613,880	400,000	161,388
Additional share capital during the year	-	2,386,120		238,612
At end of year (Long-term business)	4,000,000	4,000,000	400,000	400,000
Total	**10,000,000**	**10,000,000**	**1,000,000**	**1,000,000**

All ordinary shares are fully paid.

8. (a) Share capital (continued)

Share capital was increased in 2020 through bonus issue to meet new capital requirements by the insurance regulator. In June 2020, the company increased its share capital for long term business and short term business by capitalizing KSh 438,612,000 out of retained earnings to create a total of 4,386,118 new ordinary shares of Ksh 100 each, ranking pari passu in all respects with the existing shares of the Company.

(b) Share premium

Share premium arose during the year 2011 as a result of some bonus shares issues and purchased at a price higher than the par value.

(c) Earnings per share

Basic earnings per share is calculated by dividing the net profit for the year attributable to ordinary shareholders of the parent by the number of shares outstanding at the reporting date.

Diluted earnings per share is calculated by dividing the net profit for the year attributable to ordinary equity holders of the parent by the number of ordinary shares outstanding during the year plus the number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares. Basic and diluted earnings per share are the same. Group earnings reported for 2021 and 2020 were net profit of Ksh 864,202,000 and Ksh 559,709,000 respectively. Company earnings reported for 2021 and 2020 were net profit and net loss of Ksh 836,438,000 and Ksh 503,431,000 respectively.

The following reflects the income and share data used in the basic and diluted earnings per share computations

		Group		Company
	2021	**2020**	**2021**	**2020**
	Ksh'000	**Ksh'000**	**Ksh'000**	**Ksh'000**
Net profit attributable to ordinary shareholders for basic and diluted earnings	864,202	559,709	836,438	503,431
Number of ordinary shares for basic and diluted earnings per share	10,000,000	10,000,000	10,000,000	10,000,000
Basic earnings per share (Ksh)	**86.42**	**55.97**	**83.64**	**50.34**
Diluted earnings per share (Ksh)	**86**	**56**	**84**	**50**

There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of completion of these financial statements.

8 (d) Dividend per share

Dividend per share is calculated by dividing dividends for the year by the weighted average number of ordinary shares outstanding during the year.

	2021	**2020**
	Ksh' 000	**Ksh' 000**
Dividend proposed	**Ksh 75,000**	**50,000**
Dividend per share	**Ksh 7.50**	**Ksh 5**

In respect of the current year, the Directors propose the payment of a dividend of Ksh 7.50 (2020: Ksh 5) per share equivalent to total sum of Ksh 75 million (2020: Ksh 50 million) be paid to the shareholders.

Payment of dividends is subject to withholding tax at the rate of 5% for residents and 20% for non-residents. For resident shareholders, withholding tax is only deductible where the shareholding is below 12.5%.

9) Reserves

(a) Fair value reserve

The fair value reserve represents fair value gains/(losses) arising from the revaluation of financial assets classified at fair value through other comprehensive income and is not distributable as dividends. The movement in the fair value reserve for the Group and Company is shown below and in the statement of other comprehensive income on pages 9 and 11 respectively.

Other comprehensive income	3,038	1,398
At 31 December	107,218	92,344
The non-controlling interests consist of:		
Equity interests held by individual shareholders	107,218	92,344

10) Retained earnings

Included within retained earnings are gains arising from the revaluation of investment properties whose distribution is subject to restrictions imposed by legislation. The Insurance Regulatory Authority has placed restrictions on distribution of gains arising from the revaluation of investment properties of Ksh 3,163.258 million (Ksh 3,163.258 million for 2020).

The movement for the year is shown below.

	Group		Company	
	2021	2020	2021	2020
Retained earnings	**Ksh'000**	**Ksh'000**	**Ksh'000**	**Ksh'000**

Transfer to retained earnings	47,147	9,603	-	8,603
At 31 December	**2,488,464**	**1,825,277**	**2,227,818**	**1,651,380**

Included in the retained earnings is gain on transfer of one part of the properties (Kenindia Business Park) from General Business to Life Business. The gain which arose in 2015 and amounting to Ksh 976,837,000 is not distributable to shareholders.

11) Statutory reserve

The statutory reserve represents profits from the long term business whose distribution is subject to restrictions imposed by the Kenyan Insurance Act. The Act restricts the amounts of surpluses of the long term business available for distribution to shareholders to 30% of the accumulated profits of the life business.

Movement in the statutory reserve for the Group and Company is shown below and in the statement of changes in equity on pages 17, 18, 19 and 20 respectively.

In 2021, buildings were valued by City Valuers, independent valuers, on the basis of open market value. The carrying amount of the asset was restated to the revalued amount of the asset, and the resulting surplus arising on revaluation net of deferred income tax was recognised in other comprehensive income and credited to the revaluation surplus in equity.

Investment properties are stated at fair value, which has been determined based on valuation (open market value for existing use) performed by City Valuers Limited as at 31 December 2021. City Valuers Limited are industry specialists in valuing these types on investment properties. The fair value is supported by market evidence and represents the amount at which the assets could be exchanges between a knowledgeable, willing buyer and a knowledgeable willing seller, in an arm's length transaction at the date of valuation in accordance with the standards issued by the International Valuation Standards Committee. In estimating the fair value of the properties, the highest and best use of the properties is their current use. Valuations are performed on an annual basis using recent transaction prices for similar use assets and the fair value gains and losses are dealt with in the statement of profit or loss.

The Group enters into operating leases for all its investment properties. The rental income arising during the year amounted to Ksh 145,335,000 (2020: Ksh 145,246,000) which is included in investment income (Note 3).

Direct operating expenses (included in note 3) attributable to the rental of these properties during the year were Ksh 57,872,000 (2020: Ksh 49,199,000).

Disclosures regarding minimum lease payments have been provided in Note 38(b).

Unquoted equity investments comprise investments in shares of unquoted companies, which the Group intends to hold for long term. Although there is no market for these investments, during the year, an independent valuation of the investments was undertaken. The valuation was carried out under the International Valuation Standards' three main approaches; market approach, income approach and cost approach. Valuation was done using the market approach and a conservation view adopted.

At end of year	**82,717**	**2,409**	**85,126**	**117,242**	**370**	**117,612**

Mortgage loans, policy loans and staff motor vehicle loans are carried at amortised cost. The weighted average effective interest rates for these loans are disclosed in Note 5. There is no concentration of credit risk in respect of these loans.

Collateral

The group holds collateral against loans to loanees (staff and non-staff) in the form of mortgage interests over property and motor vehicle. Estimates of fair value are based on the value of collateral assessed at the time of borrowing, and generally are not updated except when a loan is individually assessed as impaired. The Group can liquidate the collateral in case of default. The Group holds in its custody the title deeds and log books for the assets attributable to the mortgage loans and motor vehicle loans respectively on behalf of the loanees. The title documents are released to the loanees upon full settlement of the respective loans. The collateral for the policy loans is the cash surrender value of the underlying policy. In the opinion of the directors, the collateral in place is adequate to cover the debt amount. In case of default, the policy loan is written off against the cash surrender value. None of these loans have had their terms renegotiated.

21) Receivables arising out of reinsurance arrangements

Group	Long term assurance business Ksh'000	Short term insurance business Ksh'000	2021 Total Ksh'000	Long term assurance business Ksh'000	Short term insurance business Ksh'000	2020 Total Ksh'000

22) **Receivables arising out of direct insurance arrangements (continued)**

Receivables arising out of direct insurance arrangements are non-interest bearing and are generally on cash and carry terms (require immediate settlement). Amounts that are past due are not considered impaired as these relate to active accounts and recovery is still being pursued by management.

23) **Insurance liabilities**

Insurance liabilities comprise gross claims reported, claims handling expense liabilities and the liability for claims incurred but not reported and are stated net of expected recoveries from salvage and subrogation. The expected recoveries at the end of 2021 and 2020 are insignificant.

Other receivables category is made up of amounts due from related companies, inter-departmental balance, pre-payments, deposits, outstanding rental income and miscellaneous receivables. For terms and conditions relating to related party receivables refer to note 39. Other receivables are non-interest bearing and are generally on 30-90 days terms.

24) Other receivables (continued)

(b) Kenya Motor Insurance Pool (Group and company)

The amount due from Kenya Motor Insurance Pool relates to the Group's share of net assets in a motor insurance pool where underwriters/insurance companies in Kenya were required to cede a portion of their premiums to a pool in order to cushion themselves from excessive claims arising from public vehicles incidences. The Kenya Motor Insurance Pool is able to settle claims as and when they fall due. In the opinion of the directors, the amount due from Kenya Motor Insurance Pool is recoverable.

At end of year	**784,901**	**771,053**	**764,718**	**750,757**

25) **Government securities (continued)**

At amortised cost government securities are in long term business and short term business and are carried at amortised costs (i.e. cost plus accrued discount or interest) and any premium or discount is amortised through profit or loss during the tenancy of the bond or securities. At fair value through other comprehensive income government securities are in short term business, and are carried at fair value. Gains and losses on valuation of fair value on investments at fair through other comprehensive income are dealt with in the statement of other comprehensive income.

Included in at amortised cost government securities in both long term business and short term business are treasury bonds amounting to KShs 3.9025 billion (2020: KShs 2.9025 billion) relating to securities held under lien by the Central Bank of Kenya in compliance with the requirements of Section 31 of the Insurance Act (CAP 487). These securities cannot be transferred or sold by the Company without the approval of Commissioner of Insurance.

26) **Payable (Group and Company)**

(a) **Deposit administration contracts**

Movements in amounts payable under deposit administration contracts during the year were as shown below. The liabilities are shown inclusive of interest accumulated to 31 December. Interest was declared and credited to the customer accounts at a weighted average rate of 10.75% for the year (2020: 10.75%).

	2021 Ksh'000	2020 Ksh'000
1 January	29,383,511	26,813,564

Investment income	366,948	245,190
31 December	**3,200,115**	**2,490,361**

27) **Actuarial value of policyholders' liabilities**

The company underwrites long term policies under its long term assurance business. This type of business is subjected to an actuarial method where liabilities are determined by the company on the advice of the consulting actuary and actuarial valuations are carried out on an annual basis. The annual actuarial valuation of the life fund was carried out by the company's consulting Actuaries, Pricewatercoopers as at 31 December 2021 and 31 December 2020 respectively, using the gross premium method and revealed an actuarial surplus of Ksh 1,133.71 million (2020: Ksh 1,348.27 million) after reserves set aside and before declaration of interest and bonuses to policy holders and distribution to shareholders. The actuary recommended Ksh 75 million (2020: Ksh 71 million) transfer (gross before taxes) from the life fund to the shareholders. Actual dividend to shareholders will be Ksh 52.5 million, balance to be held in retained earnings. The actuary also recommended transfer to general reserve, gross of taxes amounting to Ksh 300 million (2020: Ksh 286.14 million).

27. Actuarial value of policyholders' liabilities (continued)

Assets and liabilities of the life fund	**2021 Ksh'000**	**2020 Ksh'000**
Life fund assets	15,732,053	12,446,451
Transfer to shareholders, before tax	(75,000)	(71,000)
Transfer to general reserve, before tax	(300,000)	(286,140)
Actuarial value of policyholders' liabilities	**15,357,053**	**12,089,311**

Policy holders' liabilities are stated inclusive of cumulative provisions for interest and bonuses payable as at 31 December 2021 and 31 December 2020 respectively.

Movement is as follows:

	2021 Ksh'000	**2020 Ksh'000**
1 January	**12,089,311**	**9,738,952**
Increase/(decrease) in policyholders' bonuses and interest	3,364,414	2,350,359
Increase in actuarial liabilities in the period (net)	(96,672)	-
31 December	**15,357,053**	**12,089,311**

Actuarial assumptions:

The significant valuation assumptions for the actuarial valuation as at 31 December 2021 are summarised below. The same assumptions were used in 2020.

Material judgement is required in determining the liabilities and in the choice of assumptions. Assumptions in use are based on past experience, current internal data, external market indices and benchmarks which reflect current observable market prices and other published information. Assumptions and prudent estimates are determined at the date of valuation and no credit is taken for possible beneficial effects of voluntary withdrawals. Assumptions are further evaluated on a continuous basis in order to ensure realistic and reasonable valuations.

Mortality rates

Assumptions are based on standard industry and national tables, according to the type of contract written. They reflect recent historical experience and are adjusted when appropriate to reflect the Group's own experiences. An appropriate, but not excessive, prudent allowance is made for expected future improvements. Assumptions are differentiated by sex, underwriting class and contract type.

An increase in rates will lead to a larger number of claims (and claims could occur sooner than anticipated), which will increase the expenditure and reduce profits for the shareholders. The rates of mortality used in calculating the liability under a policy are the rates assumed in accordance with the tables published for the Institute of Actuaries in England and the Faculty of Actuaries of Scotland. The company uses the KE 2007-2010 mortality table as a base table for standard mortality rates. The rate of interest used was 4% per annum compound for all long term assurance policies. For valuing annuities, the KE 2007-2010 mortality table for annuities is used with interest at 6.5% per annum. Statistical methods are used to adjust the mortality rates reflected on the base table based on the company's experience of improvement or worsening of the mortality. There are reserves established to take account of the possible deterioration of mortality experience in respect of HIV/AIDS related deaths.

KI-REPORT-2021-5.indd 102 26/05/2022 14:39

27. Actuarial value of policyholders' liabilities (continued)

Actuarial assumptions: (continued)

Longevity

Assumptions are based on standard industry and national tables, adjusted when appropriate to reflect the Group's own risk experience. An appropriate but not excessive prudent allowance is made for expected future improvements. Assumptions are differentiated by sex, underwriting class and contract type.

An increase in longevity rates will lead to an increase in the number of annuity payments made, which will increase the expenditure and reduce profits for the shareholders.

Investment return

The weighted average rate of return is derived based on a model portfolio that is assumed to back liabilities, consistent with the long–term asset allocation strategy. These estimates are based on current market returns as well as expectations about future economic and financial developments.

An increase in investment return would lead to a reduction in expenditure and an increase in profits for the shareholders.

Expenses

Operating expenses assumptions reflect the projected costs of maintaining and servicing in–force policies and associated overhead expenses. The current level of expenses is taken as an appropriate expense base, adjusted for expected expense inflation if appropriate.

An increase in the level of expenses would result in an increase in expenditure thereby reducing profits for the shareholders.

Lapse and surrender rates

Lapses relate to the termination of policies due to non–payment of premiums. Surrenders relate to the voluntary termination of policies by policyholders. Policy termination assumptions are determined using statistical measures based on the Group's experience and vary by product type, policy duration and sales trends.

An increase in lapse rates early in the life of the policy would tend to reduce profits for shareholders, but later increases are broadly neutral in effect.

Discount rate

Life insurance liabilities are determined as the sum of the discounted value of the expected benefits and future administration expenses directly related to the contract, less the discounted value of the expected theoretical premiums that would be required to meet these future cash outflows. Discount rates are based on current industry risk rates, adjusted for the Group's own risk exposure.

A decrease in the discount rate will increase the value of the insurance liability and therefore reduce profits for the shareholders.

Sensitivity analysis on actuarial assumptions

The basis of valuation of life insurance contracts is prescribed in the Insurance Act of Kenya. The Act prescribes Net Premium Valuation method which is very conservative. Changes in actuarial basis derived from recent experience investigations do not have a significant impact in the actuarially derived reserves. The actuarial method used is not sensitive to changes in the key assumptions used in determining the actuarial liabilities. The key actuarial assumptions will need to change very significantly for the actuarial liabilities to change by a relatively small percentage.

KI-REPORT-2021-5.indd 103 26/05/2022 14:39

28) Provision for unearned premium and Unexpired risk reserve (continued)

Unearned premiums represent the proportion of the premiums written in periods up to the accounting date that relates to the unexpired terms of policies in force at the reporting date, and is computed using the 1/365th method.

Provision for unearned premium is classified as current liability.

The movement in the unearned premium and unexpired risk reserve is as follows:

Short-term deposits are made for varying periods of between one day and three months depending on the immediate cash requirements of the Group. All bank balances are subject to an average variable interest rate of 0.57% (2020: 0.33%).

The carrying amounts disclosed above reasonably approximate fair value at the reporting date. There are no restrictions or collateral held on cash and equivalents.

Bank overdraft is secured by fixed deposits held with the bank.

33) Financial instruments (continued)

(b) Fair value of financial assets and liabilities not carried at fair value

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the financial statements (i.e., held to maturity and loans and receivables).

Assets for which fair value approximates carrying value

For financial assets and financial liabilities that have a short-term maturity (less than three months), it is assumed that the carrying amounts approximate to their fair value. This assumption is also applied to demand deposits, and savings accounts without a specific maturity. For other variable rate instruments an adjustment is also made to reflect the change in required credit spread since the instrument was first recognised.

Fixed rate financial instruments

The fair value of fixed rate financial assets and liabilities carried at amortised cost are estimated by comparing market interest rates when they were first recognised with current market rates for similar financial instruments. The estimated fair value of fixed interest bearing deposits is based on discounted cash flows using prevailing money-market interest rates for debts with similar credit risk and maturity. For quoted debt issued the fair values are determined based on quoted market prices.

(c) Determination of fair value and fair value hierarchy

Below follows required disclosure of fair value measurements, using a three-level fair value hierarchy that reflects the significance of the inputs used in determining the measurements. It should be noted that these disclosure only cover instruments measured at fair value.

Level 1

Included in level 1 category are financial assets and liabilities that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level 2

Included in level 2 category are financial assets and liabilities measured using significant inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). For example, instruments measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions are categorised as level 2.

Financial assets and liabilities measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions are assets and liabilities for which pricing is obtained via pricing services, but where prices have not been determined in an active market, financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Group's own models whereby the majority of assumptions are market observable

.

Level 3

Financial assets and liabilities measured using significant inputs that are not based on observable market data are categorised as level 3. Non market observable inputs means that fair values are determined in whole or in part using a valuation technique (model) based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The main asset classes in this category are unlisted equity investments and limited partnerships. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations for which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, that is, an exit price from the perspective of the Group. Therefore, unobservable inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available, which might include the Group's own data. However, significant portion of the unquoted shares have been valued at cost and variation in inputs would not have significant fair value change.

33) Financial instruments (continued)

(c) Determination of fair value and fair value hierarchy

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy:

Group	**Level 1**	**Level 2**	**Level 3**	**Total fair value**
As at 31 December 2021	**Ksh'000**	**Ksh'000**	**Ksh'000**	**Ksh'000**
Financial assets:

34) Actuarial valuation

In accordance with section 57 of the Insurance Act as amended by the Insurance (Amendment) Act, 1994, an actuarial valuation of the life fund was carried out by Pricewatercoopers (2020: Pricewatercoopers)actuaries and financial consultants, into the financial condition in respect of the long-term insurance business of the company (individual life and group life) and revealed an actuarial surplus of Ksh 2,181.79 million (2020: Ksh 1,998.29 million) before setting aside reserves and before declaration of interest and bonuses to policyholders. The value of the entire life fund (including annuities and pensions) at 31 December 2021 before distribution to shareholders was Ksh 55,571.23 million (2020: Ksh 44,320.32 million). Transfers before tax were made out of the statutory reserve in the year amounting to Ksh 71 million (2020: Ksh 71 million) based on the recommendation of the Actuary. The actuary also recommended transfer to general reserve , gross before taxes of Ksh 235.57 million (2020: Ksh 286.14 million)

35) Weighted average effective fixed interest rates

The following table summarises the weighted average effective interest rates at the year end on the principal interest-bearing investments:

	2021	2020
	%	%
Mortgage loans	8	8
Policy loans	15	15
Government securities	12.88	12.85
Deposits with financial institutions	7.09	6.23

Deposits with financial institutions regarded as cash and cash equivalents have an average maturity of 3 months (2020: 3 months)

36) Reinsurers' share of insurance liabilities

Short term business	**2021**	**2020**
Group	**Ksh'000**	**Ksh'000**
Reinsurers' share of:		
- unearned premiums (Note 28)	**479,737**	**459,501**
- notified claims outstanding	1,831,466	2,294,938
- claims incurred but not reported	377,849	484,269
	2,209,315	2,779,207
- deferred acquisition costs	(60,054)	(52,044)
	2,149,261	**2,727,163**
At end of year	**2,628,998**	**3,186,664**
Company		
Reinsurers' share of:		
- unearned premiums (Note 28)	**303,778**	**280,183**
- notified claims outstanding	1,499,488	1,897,287
- claims incurred but not reported	**377,849**	**404,739**
	1,877,337	2,302,026
- deferred acquisition costs	(60,054)	(52,044)
	1,817,283	**2,249,982**
At end of year	**2,121,061**	**2,530,165**

36) Reinsurers' share of insurance liabilities (continued)

Amounts due from reinsurers in respect of claims already paid by the company on contracts that are reinsured are included in receivables arising out of reinsurance arrangements in the statement of financial position.

Detailed movements in the above reinsurance assets are shown below and in Notes 23 and 28.

	Group		Company	
	2021	**2020**	**2021**	**2020**
	Ksh'000	**Ksh'000**	**Ksh'000**	**Ksh'000**
At start of year	3,186,664	3,253,632	2,530,165	2,249,336
Decrease during the period (gross)	(557,666)	(66,968)	(409,104)	280,829
At 31 December	**2,628,998**	**3,186,664**	**2,121,061**	**2,530,165**

Reinsurers' share of insurance liabilities is classified as a current asset.

37) Contingent liabilities

Legal Proceedings and Regulations

The Group operates in the insurance industry and is subject to legal proceedings in the normal course of business. While it is not practicable to forecast or determine the final results of all pending or threatened legal proceedings, management does not believe that such proceedings (including litigations) will have a material effect on its results and financial position. The Group is also subject to insurance solvency regulations in all the territories where it operates and has complied with all these solvency regulations. There are no contingencies associated with the Group's compliance or lack of compliance with such regulations.

The above contingent liabilities are supported by deposits in the joint accounts of the advocates under instruction of the courts to the tune of KShs 85,679 million as at 31 December 2021.

Contingent liabilities for custom bonds, at the year-end were Ksh 1.523 billion (2020: Ksh 1.797 billion).

Material Damage Claim

The company was in discussion with its reinsurers on a matter relating to a claim by one of its clients, relating to material damage as at 31 December 2012. The lead reinsurer on the matter, had contended that the company over ceded on the surplus treaty in respect of material damage portion of the policy. The company subsequently contested this assertion by the reinsurer, and reinsurers paid off their portion of the liability.

The company then settled the claim and issued a discharge voucher which was not signed and returned as expected from the claimant alleging dissatisfaction of the quantum of the settlement. The matter is still unresolved.

From management assessment, even if the insured goes to court, any additional liability will be borne by the reinsurers and the company will only suffer to the extent of the retention limit.

38) Right-of-use assets, Lease liabilities and Commitments

a) Capital commitments

There was no capital expenditure contracted for at the reporting date but not recognised in the financial statements
(2020: Ksh Nil).

b) Operating lease commitments

The group has entered into commercial property leases in respect of its investment property portfolio. Leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

The future minimum lease payments under non-cancellable operating lease are as follows:

Group	**2021**	**2020**
Payable (as a lessee)	**Ksh'000**	**Ksh'000**
Not later than 1 year	41,821	22,170
Later than 1 year and not later than 5 years	7,002	27,138
At end of year	**48,823**	**49,308**
Group		
Receivable (as a lessor)		
Not later than 1 year	35,065	109,965
Later than 1 year and not later than 5 years	170,996	154,800
At end of year	**206,061**	**264,765**

The group has lease contracts for various office space used in its operations. Leases generally have lease terms of between 2 years and 5 years,3 months.

The group did not have leases of office space with lease terms of 12 months or less or leases with low value. Therefore, the group did not apply the short term lease and lease of low-value-assets recogntion exemptions as it did not have such leases.

c) Set out below are the carrying amounts of right-of-use assets recognised and the movements during the period:

Group	**Long term assurance business**	**Short term insurance business**	**2021**	**2020**
Lease rentals	**Ksh'000**	**Ksh'000**	**Ksh'000**	**Ksh'000**
Balance brought forward	14,049	27,021	37,384	35,109
Additions	(7,531)	8,271	740	19,035
Depreciation charge	8,358	(2,388)	5,970	(17,555)
Exchange gain/(loss)	-	795	795	795
At end of year	14,876	33,699	44,889	37,384

Set out below are the carrying amounts of lease liabilities and the movements during the period:

38) Right-of-use assets and Commitments (continued)

Group Lease liabilities	Long term assurance business Ksh'000	Short term insurance business Ksh'000	2021 Ksh'000	2020 Ksh'000
Balance brought forward	16,149	28,652	40,665	38,817
Additions	(338)	11,553	11,215	19,035
Accretion of interest	0	894	894	5,712
Payments	0	(7,739)	(7,739)	(23,707)
Exchange gain/(loss)	-	808	808	808
At end of year	15,811	34,168	45,843	40,665

The maturity analysis of lease liabilities are disclosed in Note 41.B19

The group had non-cash additions to right-of-use assets and lease liabilities of Ksh 740,000 in 2021 (2020: Ksh 19,035,000).

The group has lease contracts for various office space used in its operations. Leases generally have lease terms of between 2 years and 5 years,3 months.

The group did not have leases of office space with lease terms of 12 months or less or leases with low value. Therefore, the group did not apply the short term lease and lease of low-value-assets recogntion exemptions as it did not have such leases.

d) Set out below are the carrying amounts of right-of-use assets recognised and the movements during the period:

Company Lease rentals	Long term assurance business Ksh'000	Short term insurance business Ksh'000	2021 Ksh'000	2020 Ksh'000
Balance brought forward	14,049	15,070	29,119	21,114
Additions	(7,531)	8,271	740	19,035
Depreciation (charge) /write back	8,358	4,137	12,495	(11,030)
At end of year	14,876	27,478	42,354	29,119

Set out below are the carrying amounts of lease liabilities and the movements during the period:

Company Lease liabilities	Long term assurance business Ksh'000	Short term insurance business Ksh'000	2021 Ksh'000	2020
Balance brought forward	16,149	17,651	33,800	25,915
Additions /(Write Backs)	(338)	11,553	11,215	19,035
Accretion of interest	0	0	0	4,818
Payments	0	0	0	(15,968)
At end of year	15,811	29,204	45,015	33,800

The maturity analysis of lease liabilities are disclosed in Note 41.

The company restated the lease computations in2021 (Cashflows for 2020: Ksh 15,968,000). The company also had non-cash additions to right-of-use assets and lease liabilities of Ksh 12,495,000 in 2021 (2020: Ksh 19,035,000).

39) Related party transactions

There are several companies which are related to the company through common shareholdings or common directorship. General Insurance Corporation, New India Assurance Company Limited and Life Insurance Corporation of India are major shareholders of Kenindia Assurance Company Limited. United Insurance Company Limited, National Insurance Company Limited, Oriental Insurance Company Limited and Kaluworks Kenya Limited are related to Kenindia Assurance Company Limited through common directorship.

Kenindia Asset Management Company Limited and Kenya Pravack Limited are wholly owned subsidiaries of Kenindia Assurance Company Limited. Tanzindia Assurance Company Limited is partially owned (65%) by Kenindia Assurance Company Limited.

In the normal course of business, insurance policies are sold to related parties at terms and conditions similar to those offered to major clients.

The following transactions were carried out with related parties

Key management personnel relate to top and middle level management (general managers and assistant general managers).

40) Insurance risk

The company's activities expose it to insurance risk. The company's overall risk management programme focuses on the identification and management of risks and seeks to minimise potential adverse effects on its financial performance, by use of underwriting guidelines and capacity limits, reinsurance planning, managing insurance risk through appropriate pricing, credit policy governing the acceptance of clients, and defined criteria for the approval of intermediaries and reinsurers.

This section summarises the way the company manages key insurance risks:

The principal risk the Group faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long–term claims. Therefore, the objective of the Group is to ensure that sufficient reserves are available to cover these liabilities.

The risk exposure is mitigated by diversification across a large portfolio of insurance contracts. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements.

The Group purchases reinsurance as part of its risks mitigation programme. Reinsurance ceded is placed on both a proportional and non–proportional basis. The majority of proportional reinsurance is quota–share reinsurance which is taken out to reduce the overall exposure of the Group to certain classes of business. Non–proportional reinsurance is primarily excess–of–loss reinsurance designed to mitigate the group's net exposure to catastrophe losses. Retention limits for the excess–of–loss reinsurance vary by product line.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Group has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements.

The Group's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Group substantially dependent upon any single reinsurance contract. There is no single counterparty exposure that exceeds 5% of total reinsurance assets at the reporting date.

40) **Insurance risk (continued)**

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

(a) *Life assurance contracts*

Life assurance contracts offered by the Group include whole life and term assurance. Whole life and term assurance are conventional regular premium products when lump sum benefits are payable on death or permanent disability. Few contracts have a surrender value.

The main risks that the Group is exposed to are as follows:

Mortality risk – risk of loss arising due to policyholder death experience being different than expected.

Morbidity risk – risk of loss arising due to policyholder health experience being different than expected.

Longevity risk – risk of loss arising due to the annuitant living longer than expected.

Investment return risk – risk of loss arising from actual returns being different than expected.

Expense risk – risk of loss arising from expense experience being different than expected.

Policyholder decision risk – risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected.

These risks do not vary significantly in relation to the type of risk insured or by industry.

The Group's underwriting strategy is designed to ensure that risks are well diversified in terms of type of risk and level of insured benefits. This is largely achieved through the use of medical screening in order to ensure that pricing takes account of current health conditions and family medical history, regular review of actual claims experience and product pricing, as well as detailed claims handling procedures. Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Group has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of fraudulent claims. Insurance contracts also entitle the Group to pursue third parties for payment of some or all costs. The Group further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the Group.

For contracts when death or disability is the insured risk, the significant factors that could increase the overall frequency of claims are epidemics, widespread changes in lifestyle and natural disasters, resulting in earlier or more claims than expected. Group wide reinsurance limits on any single life insured and on all high risk individuals insured are in place.

For annuity contracts, the most significant factor is continued improvement in medical science and social conditions that would increase longevity. The Group reinsures its annuity contracts on a quota share basis to mitigate its risk.

40) **Insurance risk (continued)**

(a) *Life assurance contracts*

The following table shows the concentration of life insurance contract liabilities by type of contract;

Life assurance contract liabilities	**2021**	**2020**
	Ksh'000	**Ksh'000**
Ordinary life and riders	2,445,820	2,269,792
Group life	10,241	12,345
Capital Advantage	5,322,020	4,309,551
Bima Plans	5,953,681	3,856,473
Annuities	3,244,224	2,633,389
	16,975,986	**13,081,550**

Key assumptions and sensitivities

Refer to note 27 for key assumptions and sensitivities.

(b) Non-life insurance contracts (which comprise of general insurance and healthcare)

The Group principally issues the following types of general insurance contracts: motor, household, commercial and business interruption. Healthcare contracts provide medical expense coverage to policyholders and are not guaranteed renewable. Risks under non–life insurance policies usually cover twelve months duration.

For general insurance contracts, the most significant risks arise from climate changes, natural disasters and terrorist activities. For longer tail claims that take some years to settle, there is also inflation risk. For healthcare contracts the most significant risks arise from lifestyle changes, epidemics and medical science and technology improvements.

These risks do not vary significantly in relation to the location of the risk insured by the Group, type of risk insured and by industry.

The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits. This is largely achieved through diversification across industry sectors. Furthermore, strict claim review policies to assess all new and on-going claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are all policies and procedures put in place to reduce the risk exposure of the Group. The Group further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business. Inflation risk is mitigated by taking expected inflation into account when estimating insurance contract liabilities.

The Group has also limited its exposure by imposing maximum claim amounts on certain contracts as well as the use of reinsurance arrangements in order to limit exposure to catastrophic events (e.g. flood damage).

The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes based on the Group's risk appetite as decided by management. The overall aim is currently to restrict the impact of a single catastrophic event to approximately 50% of shareholders' equity on a gross basis and 10% on a net basis. In the event of such a catastrophe, counterparty exposure to a single reinsurer is estimated not to exceed 2% of shareholders' equity. The Board may decide to increase or decrease the maximum tolerances based on market conditions and other factors.

40) **Insurance risk (continued)**

Key assumptions

(b) *Non-life insurance contracts (which comprise of general insurance and healthcare (continued)*

The principal assumption underlying the liability estimates is that the Group's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs, claim inflation factors and claim numbers for each accident year. Additional qualitative judgements are used to assess the extent to which past trends may not apply in the future, for example: once–off occurrence, changes in market factors such as public attitude to claiming, economic conditions, as well as internal factors such as portfolio mix, policy conditions and claims handling procedures.

Judgement is further used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimates. Other key circumstances affecting the reliability of assumptions include variation in interest rates, delays in settlement and changes in foreign currency rates.

Sensitivities

The non–life insurance claim liabilities are sensitive to the key assumptions that follow. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process.

The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and equity. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non–linear.

The assumptions are as follows:

	2021			2020		
Adjustments to claims incurred in prior accident years due to change in assumption	**Gross insurance liabilities**	**Reinsurance/ reinsurers share of insurance liabilities**	**Net insurance liabilities (gross insurance liabilities less re-insurance)**	**Gross insurance liabilities**	**Reinsurance/ reinsurers share of insurance liabilities**	**Net insurance liabilities (gross insurance liabilities less re-insurance)**

41) Financial risk management objectives and policies

Financial risk

The Group's activities expose it to a variety of financial risks, including credit risk, liquidity risk, foreign currency exchange risks, interest rate risks, market price risks and the effect of changes in property values risk.

The Group is exposed to financial risk through its financial assets, financial liabilities, reinsurance assets and insurance liabilities. In particular the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance contracts. The most important components of this financial risk are interest rate risk, price risk, currency risk, liquidity risk and credit risk.

These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The risks that the Group primarily faces due to the nature of its investments and liabilities are interest rate risk and price risk.

This section summarises the way the Group manages key risks:

(i) Market risk

Market risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: foreign exchange rates (currency risk), market interest rates (interest rate risk) and market prices (price risk).

(a) **Interest rate risk**

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of the changes in market interest rates. The group has a large portion of its investments in interest (fixed) earning deposits and government securities and variable interest investments such as bank balances. Interest rate risk arises primarily from the group's investments in fixed and variable income securities, which are exposed to fluctuations in interest rates. Floating rate instruments expose the Group to cash flow interest risk, whereas fixed interest rate instruments expose the Group to fair value interest risk. The Group's interest risk policy requires it to manage interest rate risk by maintaining an appropriate mix of fixed and variable interest rate instruments.

The sensitivity analysis on interest rate risk over insurance participating and assets backing life shareholders is shown in Note 27.

Appraisal of investment portfolio is done on a regular basis and the investment spread reviewed depending on the existing interest rates. The group has also placed significant balances in fixed deposits. However, the Group has no loans and borrowings and therefore is not exposed to interest rate risk as far as loans and borrowings are concerned.

The impact of Group's liabilities to interest rates is shown in Note 27 (under 'sensitivity analysis on actuarial assumptions'). Short term non-life insurance liabilities are not impacted by interest rate risk since discounting of future cash flows of claims is not carried out. Non-life claims are stated on actual basis.

The quantitative exposure to interest rate risk as required by IFRS 7 is shown below:

Changes in interest rates (for assets with fixed and variable interest rates) will have the following impact in the statement of profit or loss :-

41) Financial risk management objectives and policies (continued)

(i) Financial risk (continued)

(a) Market risk (continued)

Interest rate risk

		Group		Company	
	% change in base	2021	2020	2021	2020
Financial assets		Ksh'000	Ksh'000	Ksh'000	Ksh'000
Variable interest rates					
Bank balances	+(-)10.00%	21,400	25,882	11,065	16,485
Fixed interest rates					
Government securities (At amortised cost)	+(-)10.00%	5,562,160	4,457,481	5,567,872	4,452,077
Deposits with financial institutions	+(-)10.00%	95,781	61,470	77,027	24,687
Mortgage loans	+(-)10.00%	424	424	424	424
Policy loans	+(-)10.00%	10,179	11,016	10,179	11,016
Government securities (At fair value through other comprehensive income)	+(-)10.00%	78,490	77,105	76,472	75,076

The group has no significant concentration of interest rate risk other than what is currently disclosed. The method used for deriving sensitivity information and significant variables did not change from the previous period.

(b) Currency rate risk

Currency rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The company predominantly transacts in the local currency (Kenya shillings). The risk associated with transactions in other currency (US Dollar) is considered nominal. Except for an amount of USD 12,454 (Ksh 1,409,089) equivalent, held as bank balances, all other balances are originally denominated in the local currency. If the US Dollar was to appreciate against the Kenya Shilling by 5%, with all other factors remaining constant, the post-tax profit would be higher by Ksh 133,522. About 82% of the group's business is generated in Kenya, 18% from the subsidiary (Tanzindia Assurance Company Limited) whose transactions are originally denominated in Tanzania Shillings (TShs). The foreign currency translation of the subsidiary was Ksh 3,744,060 (2020: Ksh 13,533,000). The group has no significant concentration of currency risk.

41) **Financial risk management objectives and policies (continued)**

(i) **Financial risk (continued)**

(c) **Price risk**

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than arising from interest rate risk or currency risk), whether those changes are carried by factors specific to the individual financial instrument or its issuer or factors affecting all similar financial instruments traded in the market.

The capital is invested in equities and interest-bearing instruments (government securities) that are valued at fair value and are therefore susceptible to market fluctuations. Management assesses the trend in the market prices and the interest rates and ensures a smoothening effect by balancing the portfolios, without contravening investment mandates, in order to ensure investment income growth as well as stability in equities. The Group has no significant concentration of price risk.

At 31 December 2020, if the prices of listed equities at the Nairobi Securities Exchange had appreciated by 5% with all other variables held constant, the profit for the year for the Company would have increased by Ksh 5,262,350 (2019: Ksh 7,696,150) for long-term business and Ksh 1,443,000 (2019: Ksh 2,069,650) for short-term business respectively. The method used for deriving sensitivity information and significant variables did not change from the previous period.

Changes in prices of Government Securities (Available-for-sale investments) for the Group and Company will have the following impact in statement of profit or loss and equity.

	% change in base	2021 Ksh'000	2020 Ksh'000
Group-Short term business			
Government securities (At fair value through other comprehensive income)	+(-)5%	39,245	38,553
Company-Short term business			
Government securities (At fair value through other comprehensive income)	+(-)5%	38,236	37,538

(ii) **Credit risk**

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation

The following policies and procedures are in place to mitigate the group's exposure to credit risk.

The group trades only with recognised, creditworthy third parties. It is the group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal ratings in accordance with limits set by the management. In addition, receivable balances are monitored on an ongoing basis with the result that the group's exposure to bad debts is not significant. There are no significant concentrations of credit risk within the group.

41) **Financial risk management objectives and policies (continued)**

(ii) **Financial risk (continued)**

Credit risk (continued)

·Credit risk in respect to re-insurance is managed by placing the group's reinsurance only with companies that have high international or similar ratings.

The amount that best represents the Group's and the company's maximum exposure to credit risk at 31 December is made up as follows:

		Group		Company

41) **Financial risk management objectives and policies (continued)**

Impaired financial assets
Collateral is held for loans receivables. For reinsurance assets and insurance receivables, no collateral is held as security for any past due or impaired assets.

The Group and Company records impairment allowances for loans and receivables in a separate impairment allowance account. A reconciliation of the allowance for impairment losses for loans and receivables is as shown in note 22.

(iii) **Liquidity risk**

Liquidity risk is the risk that the Group will encounter difficulty, in meeting obligations associated with its financial liabilities. In respect of catastrophic events there is also a liquidity risk associated with the timing differences between gross cash out flows and expected reinsurance recoveries. Investment policies are in place, which help manage liquidity, and seek to maximise return within an acceptable level of interest rate risk.

The following policies and procedures are in place to mitigate the Group's exposure to liquidity risk: A Group liquidity risk policy which sets out the assessment and determination of what constitutes liquidity risk for the Group. Compliance with the policy is monitored and exposures and breaches are reported to the Group risk committee. The policy is regularly reviewed and for changes in the risk environment. Contingency funding plans are in place, which specify minimum proportions of funds to meet emergency calls as well as specifying events that would trigger such plans.

The Group is exposed to daily calls on its available cash for claims settlement and other administration expenses. The Group does maintain cash resources to meet all these needs and experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of stability.

·The Group holds a large portion of its assets in short term deposits and investments that are easily convertible to cash.

The cash flow position of the Group is reviewed on a weekly basis.

Maturity profiles

The table that follows summarises the maturity profile of the financial assets and financial liabilities of the Group based on remaining undiscounted contractual obligations, including interest payable and receivable. Liabilities and payables represent non-discounted cash flows.

For insurance contracts liabilities in short term business and reinsurance assets, maturity profiles are shown on undiscounted basis. Unearned premiums and the reinsurers' share of unearned premiums have been included in the analysis although they are not contractual obligations, since insurance items are included in IFRS 7 disclosures as if the insurance items were financial instruments. Re payments which are subject to notice are treated as if notice were to be given immediately.

The Group maintains a portfolio of highly marketable and diverse assets that can be easily liquidated in the event of an unforeseen interruption of cash flow. Reinsurance assets have been presented on the same basis as insurance liabilities. Loans and receivables include contractual interest receivable (if any).

41) **Financial risk management objectives and policies (continued)**

Operational risk

Operational risk is the risk of loss arising from system failure, human error, fraud or external events.

The Group mitigates this risk through its culture and values, a comprehensive system of internal controls and other measures such as back-up facilities, contingency planning and insurance. The initiation of transactions and their administration is conducted on the basis of the segregation of duties, designed to ensure the correctness, completeness and validity of all transactions.

Compliance risk

Laws and regulations:

The Group considers compliance with applicable laws, industry regulations and codes an integral part of doing business. The Group's management facilitates the compliance through the analysis of statutory and regulatory requirements, and monitoring the implementation and execution thereof.

Compliance with Investment mandates:

Management reviews compliance with Investment mandates on a monthly basis. When a possible breach is detected, management ensure that immediate remedial action is taken.

Property risk:

The capital portfolio has limited exposure to investment properties and accordingly the related property risk. Diversification in property type, geographical location and tenant exposure are all used to reduce the risk exposure.

42) **Capital management**

Externally imposed capital requirements are set and regulated by the Insurance Regulatory Authority (IRA). These requirements are put in place to ensure solvency margins are maintained in the insurance industry. Further objectives are set by the group to maintain a strong credit rating and healthy capital ratios in order to support its business objectives and maximise shareholders value.

Further, the company currently has a paid up capital of Ksh 400 million in the long term business which meets the minimum (Ksh 400 million) requirement as per the Insurance Act. In the short term business, the company's paid up capital should not be less than 10% of the total gross premium written in the short term business during the year or Kshs. 600,000,000.00. The paid up capital is Ksh 600,000,000 (2020: Ksh 600,000,000) while 10% of gross premium written is Ksh 2,580 million (2020: Ksh 2,470 million).

The company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, issue new capital or sell assets to reduce debt.

43) **Prior year adjustments**

Prior year adjustments relate to reclassification of actuarial liabilities from fund balance basis to actuarially determined basis(for ordinary life, group life and annuities).

44) Company solvency margins and capital adequacy

Capital adequacy

As per the new Insurance Act requirements, capital adequacy ratios are as follows:

	Short term business	
	2021	2020
	Ksh'000	Ksh'000
Minimum required capital	1,406,242	1,391,231
Total capital available	2,415,091	2,368,689
Capital adequacy ratio	**172%**	**170%**
Capital adequacy ratio minimum	**100%**	**100%**

	Long term business	
	2021	2020
	Ksh'000	Ksh'000
Minimum required capital	2,691,059	2,123,941
Total capital available	2,681,743	2,412,175
Capital adequacy ratio	**100%**	**114%**
Capital adequacy ratio minimum	**100%**	**100%**

45) Incorporation and registered office

The company is incorporated in Kenya under the Companies Act. The address of the registered office is given on page 1.
